Prices Subject To Change Without Notice.

New York, September 15th, 1924

This Issue Cancels All Previous Quotations

WHEN YOU ORDER

Please use our catalog numbers. Give full particulars of gauge, caliber, length, size, color, etc., etc., as maybe required. Give full name and shipping instructions; please be exact. Please give name and address.

Post Office, County and State, and your shipping point, if different from Post Office.

Catalog number in full and all specifications and measurements.

Exact amount of money enclosed, if any.

Attention to the above will save time and temper.

INSTRUCTIONS FOR ORDERING

Be sure and state catalog numbers of articles ordered. Don't forget size of gauge, caliber, length, and other specifications, and always include complete shipping instructions together with your full name.

Our shipping department is in a position to handle orders by telephone, telegraph or mail for shipment by truck, express, freight or parcel post. Always mention which way goods are to be shipped.

From customers not rated, bank draft, M. O., or Cash with order is better than a C. O. D. shipment and saves carriage charges.

DELIVERY OF ORDERS

All goods will be shipped by Freight, Express, or Parcel Post, according to bulk and weight, unless otherwise specified.

Registration on mail packages cost 10 cents per package.

Insurance on mail packages up to \$5.00, 3 cents; up to \$25.00, 5 cents; up to \$50.00, 10 cents; up to \$100.00, 25 cents.

We cease to be responsible after goods have been delivered to the common carrier.

Explosives cannot be sent by U. S. Mail. We make no charge for packing or delivering to transportation company.

REMITTANCES

Firms or persons without commercial rating please remit with order.

Remittances should be made by Post Office Order, Express Money Order, Cash or Bank Draft.

Make checks payable to A. F. STOEGER, INC.

Remittance with order is preferable to a C. O. D. shipment. You run no risk and you save the return charges. C. O. D. orders must include a 10% payment.

If your order cannot be filled **cash will be returned**. We guarantee all goods perfect and as represented.

DELIVERY BY U. S. PARCEL POST

Packages not exceeding weights as given below and not exceeding 72 inches in length and girth combined, can be sent by mail. Parcel Post packages are delivered to your door and are the cheapest form of delivery. We print below a summary schedule of rates from New York:

Parcel Post Zones and Rates									
Case	Local Rate	1st Zone	2d Zone	3d Zone	4t Zone	5th Zone	6th Zone	7th Zone	8th Zone
		50 to 150 Miles	150 to 300 Miles	300 to 600 Miles	600 to 1000 Miles	1000 to 1400 Miles	1400 to 1800 Miles	All over 1800 Miles

REPAIR WORK

Each arms sent for repairs must be properly tagged with name and address of sender, so there can be no mix-up on this end. It is also necessary to state on tag whenever possible the kind of repairs needed.

GUARANTY

We are the only exclusive Importers and Jobbers in Fire Arms and Ammunition in the United States.

Any article described in this Catalog is guaranteed to be in perfect condition when shipped. Otherwise, goods may be returned and exchanged or money refunded.

THE HOUSE OF A. F. STOEGER, Inc.

Always stands ready to render any information or service to the trade or the individual seeking advice on imported arms or ammunition. Our experts cover every phase of English, German, Austrian, Belgian and Spanish arms manufacturing and their knowledge is based on a thorough training in many foreign gun plants.

Our recommendations can always be relied upon. We hope that we can serve you.

Index of Contents on Rear Page

Taking Care of the Gun

is about the most important duty of the shooter. It is strange how many who invest a good deal of money in a rifle, shot gun or revolver at one time or another, overlook this most important duty.

With the modern nitro powder it is most important that the arm should be thoroughly cleaned immediately after shooting, but it is just as important to carefully inspect your arm occasionally and go over it carefully so as to prevent an accumulation of any foreign matter in the barrels, as any obstruction might prove disastrous when using the gun.

Very often barrels are brought to us with a bulging ring which, of course, make the same unfit for any further use. The shooter often attributes this to some defect in the make of the arm, but it really is due to swelling of the barrel at a point where some foreign matter caused excessive pressure during the explosion while shooting.

The greatest care is necessary in handling your gun when out hunting so as to prevent bending of the barrels or the entering of dirt into the barrels of your gun. In the excitement of the hunt this precaution is often overlooked with results fatal to the gun.

Make it your business to clean your rifle, shot gun, pistol, or revolver carefully after every use, and for this purpose nothing will take the place of "Stoegerol" of which we are the sole owner and which is unquestionably the only combination oil for the perfect cleaning and preservation of firearms.

"Stoegerol" is the solution of all firearm troubles resulting from rust, nitro corrosion, etc. This chemical oil combines with the acid reaction of the nitro powders and dissolves same in the resulting saline solution. Besides, "Stoegerol" has the property to prevent rust to a much greater degree than any other oil... This special quality prevents also the rusting of guns or parts exposed to rain and dampness. Do not fail to clean the barrel and the lock of your gun after its use. It will be sufficient until you use the gun again, but of course it is safer to look after it occasionally and keep your firearms in a high state of efficiency at all times. Although "Stoegerol" is probably the most expensive gun oil, those who have used it will testify that it is the very cheapest in the long run.

When you put your arm away at the close of the season, give it a thorough cleaning with this oil.

Beware of untried gun oils which have no advantages excepting possibly their cheapness.

A special description of the remarkable qualities of "Stoegerol"—the wonderful combination gun oil—is given on a separate page in this catalogue.

GUN REPAIR DEPARTMENT

We have a complete repair department where we make repairs and alterations on all kinds of rifles, shot guns or any other description of small arms. This repair work is done by master workmen of many year's experience at prices consistent with first-class work.

SPECIAL WOODWORKING DEPARTMENT

Our woodworking and fitting department undertakes the making of new stocks, fitting, bending, straightening, and recoil pad fitting.

We call attention to our expert work in making gun stocks, from the plainest to the finest quality, including checkering and carving.

ENGRAVING DEPARTMENT

Our engraving department employs expert engravers on metal work of all kinds.

We are leaders in expert work in boring, also bluing, polishing, refinishing, and renewing shot guns and rifles. We especially recommend our work in the choking of shot gun barrels, making new solid or ventilated ribs for shot guns or rifles. Anything in the line of high-grade work on shot guns or rifles is our specialty; also fitting and refitting of stocks and barrels, for instance like the refitting or changing of drops in shot guns or rifles.

TELESCOPES AND TELESCOPE MOUNTING

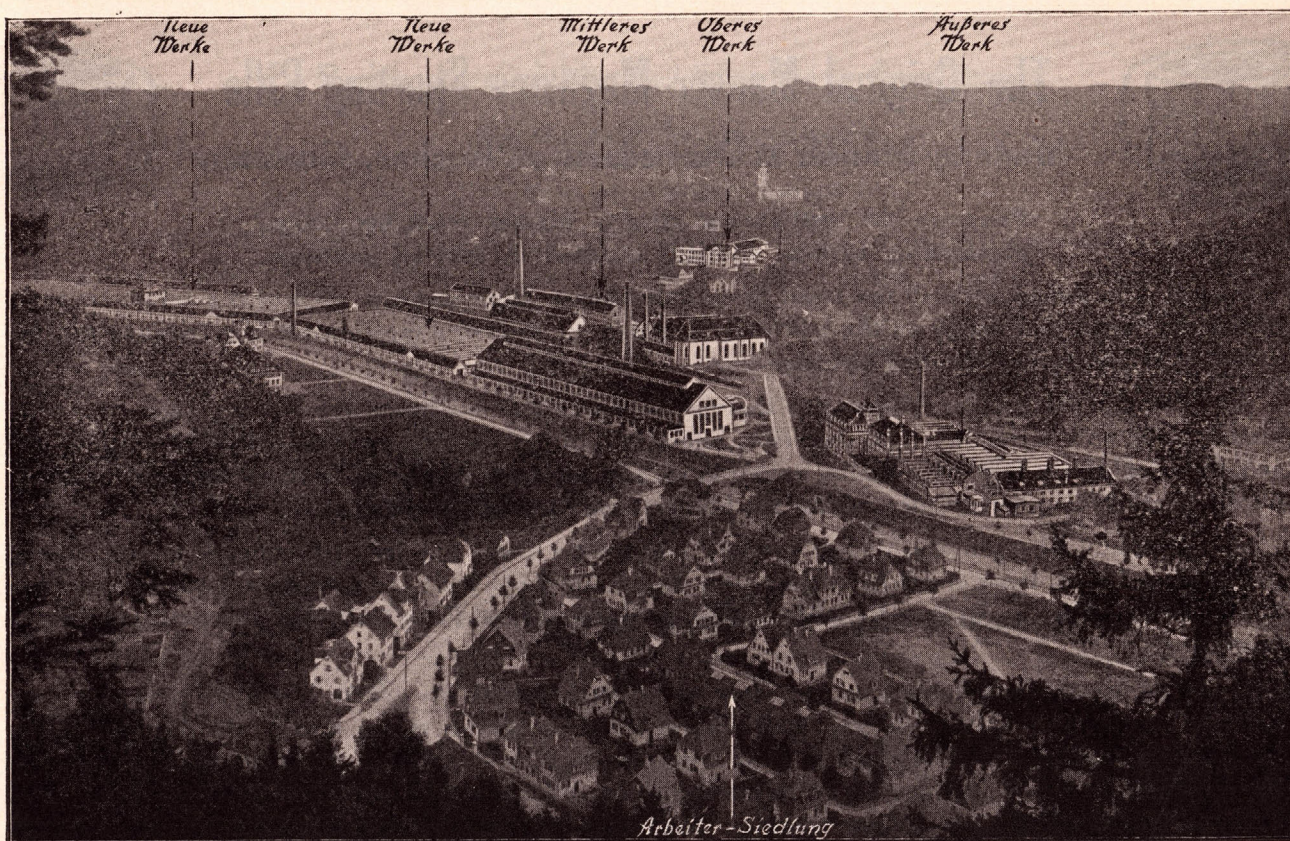

We are leaders in fine telescope work. There has been a long-felt want for a shop to do this kind of work and sportsmen will no longer experience the trouble they have had in obtaining absolutely correct fitting telescopes, properly and scientifically tested and targeted.

We furnish the best makes of telescopes in any type desired, fitting them with any mounting for any rifle, three barrel guns, and combination over and under rifle and shot gun.

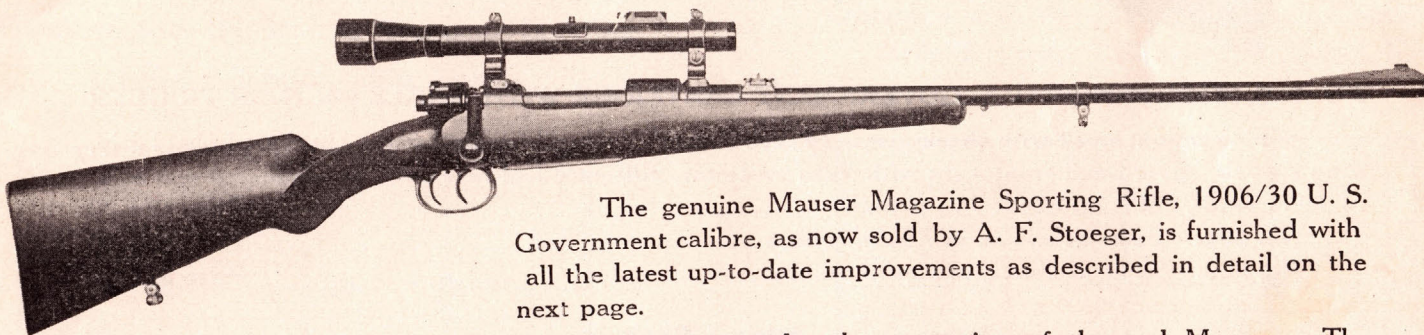

REPAIR PARTS

We make a specialty of repair parts for any make of shot gun, rifle, pistol, etc., no matter how difficult. We carry the best assorted line of repair parts in the United States. In case parts for firearms are not manufactured any more, we are in position to make these parts in a perfect manner, on shortest possible notice, at reasonable prices.

Warning to Buyers

A. F. Stoeger is the only authorized importer for the United States and Canada of the **genuine** and **original** rifles manufactured by the Waffenfabrik Mauser at Oberndorf-on-the-Neckar, Germany. Mauser rifles have maintained their enviable reputation for generations, and are used by the leading armies of the world, including that of the United States. The United States Government Springfield rifles are manufactured under the Mauser patent.

The genuine Mauser Magazine Sporting Rifle, 1906/30 U. S. Government calibre, as now sold by A. F. Stoeger, is furnished with all the latest up-to-date improvements as described in detail on the next page.

Many so-called hyphenated Mauser rifles have, of late, been flooding the market and have been palmed off to unsuspecting buyers at low prices. Various manufacturers who have secured cast-off Mauser military actions designate their products as Mausers, in combination with some other name, thus taking advantage of the world-wide fame of the original Mauser product. This fact must be mentioned to enlighten prospective buyers concerning the truth about **genuine** Mauser rifles and imitations trading

under the reputation of the real Mauser. The sportsman-owner of the **genuine** Mauser need not be told the difference; experience has taught him to distinguish readily between the genuine Mauser and its spurious imitations, claiming to be the genuine. All **genuine** Mauser Sporting Rifles for the 1906 U. S. Government ammunition, or any other calibre, are marked with the Mauser name, and bear the official proof marks recognized the world over.

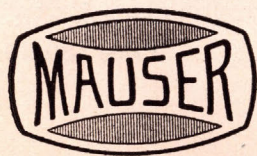

Detailed descriptions and illustrations of these rifles are on the following pages.

All orders will be given the promptest and best attention, and assurance is given of satisfaction and that no better rifle value is possible than that embodied in the Mauser.

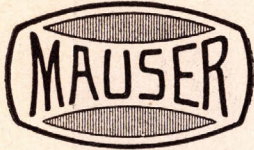

Very truly yours,

A. F. STOEGER,

Sole Authorized Importer for the United States

224 EAST 42nd STREET Within a Block of Grand Central Sta. NEW YORK, N. Y.

The Original Mauser Magazine Sporting Rifle

Made by Mauser at Oberndorff-on-Neckar, Germany

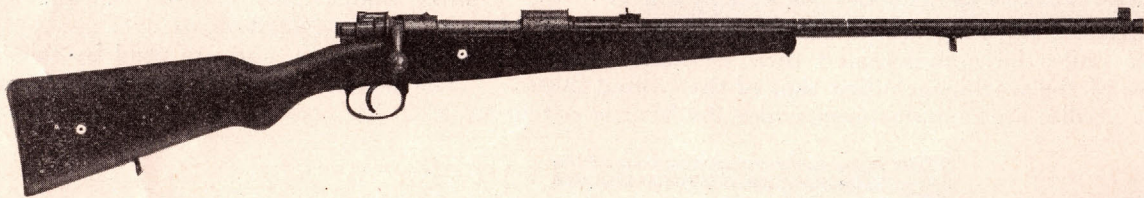

Possesses the well-known genuine Mauser repeating action, clip-loading system, specially adapted to sporting purposes.

It is furnished with all the latest up-to-date Mauser improvements, such as the automatic cocking arrangement, and flange on the bolt plug to guard the shooter's face against any escaping powder gases in the event of a defective cartridge case.

Since in the genuine Mauser rifle there is no detachable bolthead, the locking lugs are consequently solid with the bolt. It is, therefore, impossible to fire the rifle with the bolthead missing, and equally so unless the lugs are properly seated in their respective recesses. The same degree of safety is hardly possible in other systems, where the bolthead carrying lugs is detachable.

Weight. The genuine Mauser sporting rifle weighs about 7½ lbs. (the models for the special cartridges 6.5 m/m short and 8 m/m short only weigh about 6½ lbs.) is a sporting weapon of considerable ballistic properties, as may be judged from the particulars of firing tests of which details are given further on.

The Magazine, holding five cartridges, is situated beneath the action; it is filled from above by means of the original Mauser charger, and receives the cartridges in zigzag order. At the bottom the magazine is closed by a plate which is flush with the stock, and prevents the admission of moisture, impurities, and other foreign matter. The loading or insertion of single cartridges can easily be effected by hand, either with or without the charger. Single cartridges have only to be placed on the platform and pressed into the magazine. The magazine may thus be replenished to its full capacity at any time and at a minimum expenditure of time and trouble.

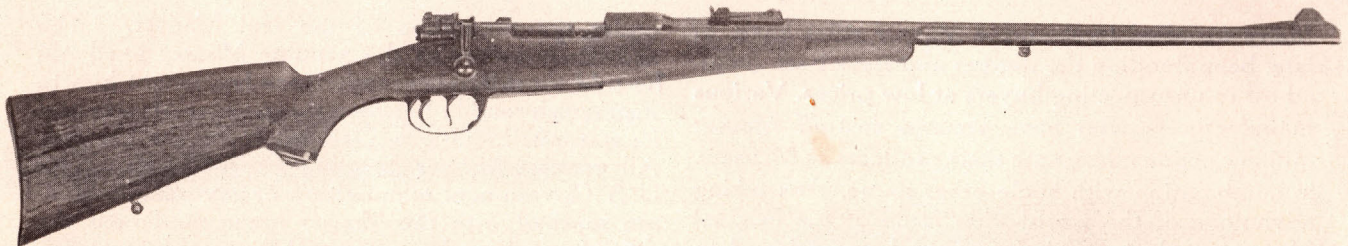

NO. 600—FOR 1906/30 U. S. GOVERNMENT CARTRIDGE WITH SINGLE OR HAIR TRIGGER

Fine walnut stock with cheek piece, 24-inch round barrel, rubber butt plate, checkered pistol grip, sling swivels, silver bead front sight with sight protector, 300-yard leaf rear sight, or graduated rear sight to 1000 yards. Weight about 7½ pounds. Price \$70.00

No. 601. Same as above, in 7 m/m calibre Price \$55.00

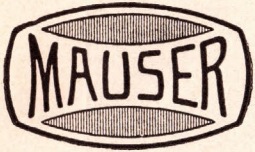

No. 602. Same as above, in 8 m/m calibre. Price \$55.00

NO. 610—FOR 1906/30 U. S. GOVERNMENT CARTRIDGE

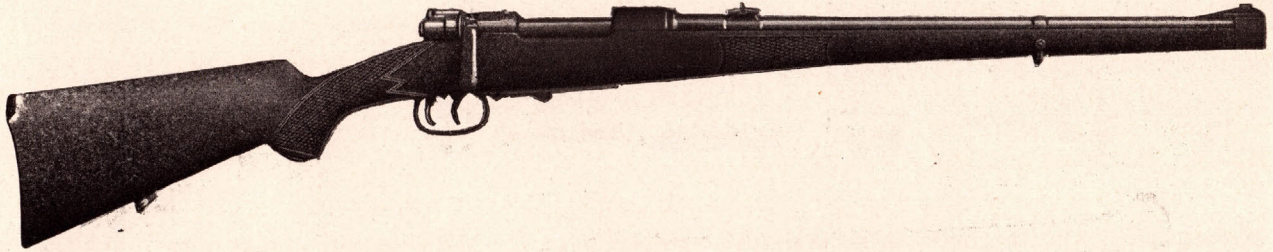

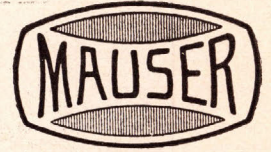

High grade selected Circassian Walnut stock with cheek piece, 24-inch octagon barrel, raised matted rib, fish-skin checkered pistol grip and forearm, sling swivels, silver bead front sight with sight protector, rear sight graduated up to 1000 yards. Particular care has been taken to give the Sportsman a rifle which, for workmanship and finish, cannot be excelled. Both the 1906 Service and Sporting cartridges can be used in this rifle. Weight about 7½ lbs. Price \$80.00

This Rifle can also be ordered in calibres 6.5 m/m, 9 m/m, 10.5 m/m.

GENUINE MAUSER MAGAZINE SPORTING RIFLES

CHAMBERED FOR 1906/30 U. S. GOVERNMENT CARTRIDGE

ORIGINAL MAUSER ACTIONS (Systems)

We are prepared to furnish to Gunsmiths our Genuine Waffenfabrik Mauser Rifle Actions in the following calibers:

No. 650. Original Mauser Short Action for 6.5 caliber \$47.50

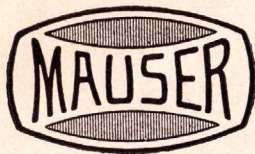

No. 651.	Original Mauser Action for 7, 8, 9 mm. or 30.06 cal.	\$47.50
No. 652.	Original Mauser Action for 9.3 x 62 or 10.75 x 68 cal.	\$55.00
No. 653.	Original Mauser Action for .275 or .375 Magnum	\$55.00
No. 654.	Original Mauser Action, for .404 Magnum	\$60.00
No. 655.	Original Mauser Action for .404 Jeffery's	\$60.00

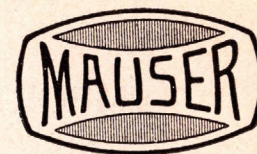

NEW METHOD GUN BLUER

This Bluer is especially adapted for refinishing guns. It strengthens the original finish and arrests active oxidation. It brings back the newness to a badly worn or disfigured firearm. This preparation is easy to apply and will withstand hard usage. Contents, 1-8 pint. \$1.00

ORIGINAL MAUSER, Calibre .22 (long rifle) PRECISION TARGET RIFLE

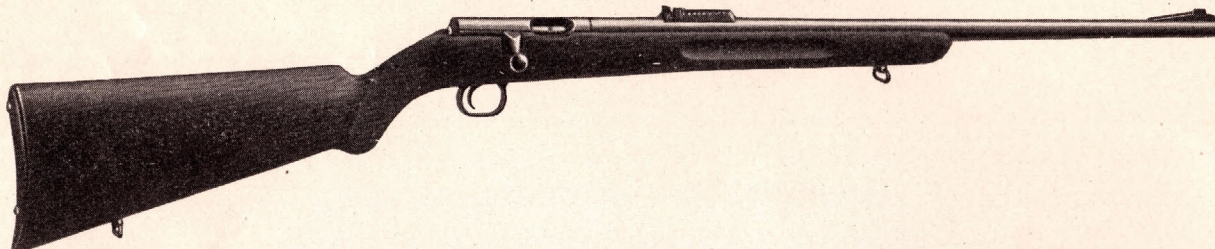

To comply with the steadily increasing demand for a "genuine Mauser" small calibre Rifle, The Mauser Arms Works now offers this type of Sporting Arm, which is constructed with the same care and precision as all other genuine Mauser arms. The small calibre Mauser Rifles are made in different models as hereafter enumerated in order to comply with the demand for either hunting or outdoor as well as indoor target shooting.

No. 925. Mauser Single shot .22 long rifle cal., birch stock, with pistol grip, round barrel 19 $\frac{3}{4}$ inches long, metal parts blued, length of gun 36 $\frac{3}{4}$ inches, weight about 4 lbs.

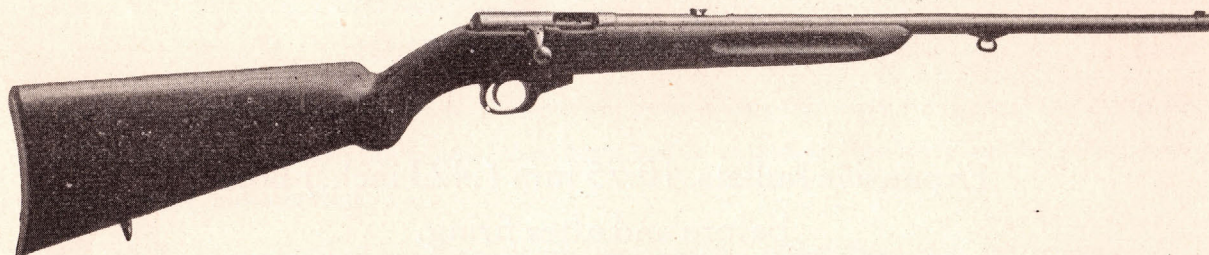

No. 926. Mauser Single Shot .22 long rifle cal., walnut stock with checkered pistol grip, metal parts blued, adjustable rear sight, bead front sight, sling swivels, length of the barrel 23 $\frac{3}{4}$ inches, length over all 36 $\frac{3}{4}$ inches, weight about 4 $\frac{1}{4}$ pounds.

No. 927. Mauser Single Shot Sporting Rifle, .22 long rifle cal., fine walnut stock with checkered pistol grip, grooved fore-end, metal parts blued, adjustable rear sight for 30, 50, 100, 125, 150, 180, 200 yards, bead front sight, sling swivels, heavy barrel, length of barrel 25 $\frac{1}{2}$ inches, length overall 43 $\frac{3}{4}$ inches; action with safety weight 6 $\frac{1}{2}$ to 6 $\frac{3}{4}$ lbs.

These Rifles Can Be Fitted With Telescope

No. 923. Mauser Sporting Rifle, .22 long rifle cal., with magazine for 5 cartridges, fine walnut stock with checkered pistol grip, grooved fore-end, metal parts blued, adjustable rear sight for 30, 50, 100, 125, 150, 180, 200 yards, bead front sight, sling swivels, heavy barrel, length of the barrel 25 $\frac{1}{2}$ inches, length overall 43 $\frac{3}{4}$ inches, action with safety, weight 6 $\frac{1}{2}$ to 6 $\frac{3}{4}$ pounds.

This rifle, if required, can be delivered with telescope.

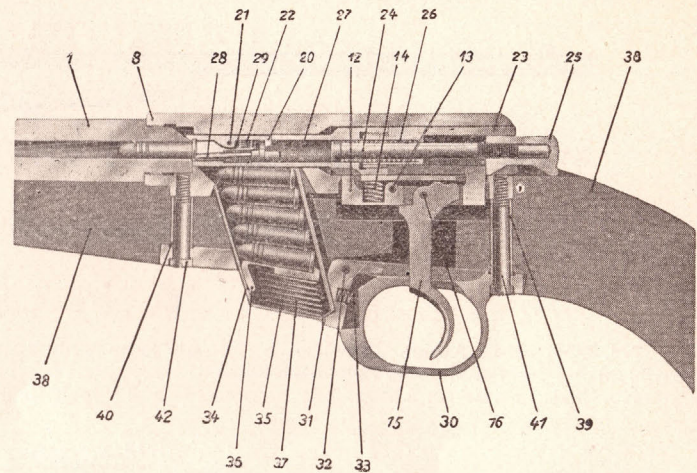

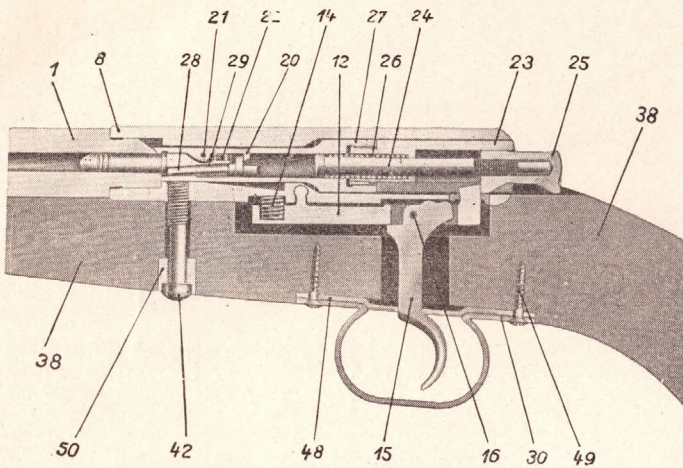

No. 929. Mauser Sporting Rifle with magazine for 5 cartridges, .22 long rifle cal., fine walnut stock with checkered pistol grip, grooved fore-end, metal parts blued, adjustable rear sight, bead front sight, sling swivels, length of the barrel 23 $\frac{3}{4}$ inches, length over all 40 $\frac{3}{4}$ inches, weight about 4 $\frac{3}{4}$ pounds.

This rifle, if required, can be delivered with telescope.

All Prices on Application.

- No. 975. Warrant System Precision Target Rifle, 27¾ inch octagon barrel, express boring for .22 long rifle cartridges, matted rib, adjustable rear sight and bead front sight, hair trigger, checkered pistol grip, fine walnut stock. Weight about 7 lbs. Price **\$24.75**

THE .32 CAL. AUTOMATIC RIFLE

Shoots .32 Caliber Pistol Cartridges

The Rifle is constructed with spring locking, without complicated bolting.

The opening of the locking spring is brought about instantly by the pressure of the powder gases on the breech end of the bore. During the movement for opening or closing, the locking slide moves in a direct line parallel to the axis of the bore.

Its recoil compresses the recoil spring, the counter-pressure of which absorbs the recoil, which is finally stopped by the very strong and massive breech of the locking frame. It is, therefore, impossible for the locking slide to fly out backwards and injure the shooter. The comparatively heavy weight of the locking slide considerably reduces the strain on the recoil spring, and the breech of the locking frame. It has a cylindrical plunger lock.

When the lock is cocked, the shaft of the firing pin stands out from the back of the locking slide, replacing the indicator.

A safety bolt at the right of the frame prevents the discharge of the rifle when loaded and cocked.

If the rifle is put "safe" when **unloaded** and **uncocked**, the locking slide can not be drawn back, so that the uppermost cartridge in the magazine can not rise and slip into the barrel.

The locking frame is fixed to the forepart of the rifle frame with a hinge, and tips forward when the lock is uncocked, by pressing aside the bolt on the left side of the frame to the right with the thumb. These two fittings facilitate the dismounting of the weapon for cleaning, no tool being necessary.

The interchangeable magazine holds six cartridges. The Rifle is handy, with a weight of 5 lbs., a length of the barrel 18 7-8 inches, a length over all 37 1-2 inches, and its balance is excellent. The stock is of selected walnut, and provided with pistol grip, and horn heel plate.

The construction is simple, and the thorough finish of the parts which carry the greatest strain, together with the careful machine work, guarantees reliable working of the mechanism, and great durability of the rifle.

It is a very accurate weapon, and its power of penetration is great.

THE SIMULTANEOUS OPERATION OF THE LOCKING AND LOCK PARTS AT FIRING

The recoil starts at the moment of firing; the pressure of the powder-gasses drives the projectile forward, and the locking slide is opened the moment the charge leaves the barrel.

The recoil spring is compressed by the recoil of the locking slide; and the empty shell, whose bottom rim was gripped by the extractor at loading, is turned against the ejector, and thrown out at the top.

When the locking slide has got as far back as possible it is pressed forward by the compressed recoil spring, the firing pin is held back by the trigger-hook, and the firing pin spring is compressed.

The lock is also cocked, and the upper cartridge is pushed into the barrel at the same moment as the locking slide slips forward.

The rifle is now loaded and cocked; the pulling of the trigger drops the trigger-hook; the firing pin is set free, and is driven by the firing pin spring on the primer of the cartridge, and the shot is fired.

Its recoil sets the mechanism working again.

MANIPULATION OF THE RIFLE

To take out the magazine—To remove the magazine, press the catch at the back and draw it out.

To fill the Magazine.—Take the magazine in the left hand, and with the right press the cartridge in from above, the projectile towards the round part of the magazine.

To insert the Magazine—Push the magazine into the frame from underneath, with the round side to the front, until the catch snaps.

To load and cock the Rifle—When the magazine is inserted, take the stock of the rifle in one hand, and with the thumb and first finger of the other draw the locking slide by its fluted cheeks as far back as possible, then let go.

The shaft of the firing pin which projects from the back of the locking slide shows that the rifle is ready to fire.

To put "safe" and "unsafe"—To put the rifle "safe" twist the safety stud at the right of the frame downwards and backwards. To put it "unsafe" bring the stud to its former position.

To unload—After removing the magazine, draw the locking slide back, as in loading and cocking; by this means the cartridge will be ejected from the barrel.

To dismantle and assemble the rifle.—Before dismantling, take out the magazine, and having made certain that there is no cartridge in the barrel, uncock the lock; press the bolt to the right, tip up the locking frame, and take the locking slide out of it.

The barrel is now ready for cleaning.

In dismantling the lock, raise the extractor until it slips out of the groove in the locking head piece, give the latter a half turn right or left, and draw it out; then take out the firing pin, the locking spring support, and last of all the firing pin spring.

It is not necessary to remove the trigger mechanism, but this is easily done by loosening the pin in the locking frame.

To assemble the rifle, reverse the directions for dismantling.

RIFLE TELESCOPES—FOR BETTER SIGHTING

For modern long distance shooting, telescope mounted rifles have no equal. The Telescope will be found a most useful addition to a rifle where only long shots are obtainable and where the game is frequently of a color resembling its surroundings. It can be used, and effective aim taken, in bad lights or twilight, when with the ordinary sight the objective cannot be seen. It also enables the shooter to pick out the best head when several animals are in the field of view.

The Telescopes are fitted with an adjustable screw disc which elevates or depresses the cross wire and the different elevations are shown on the dial. The dial on sporting rifle Telescopes is usually marked for 100, 200 and 300 yards, but can be marked for longer ranges if ordered. There is a small locking screw to fix the dial in any position, if required.

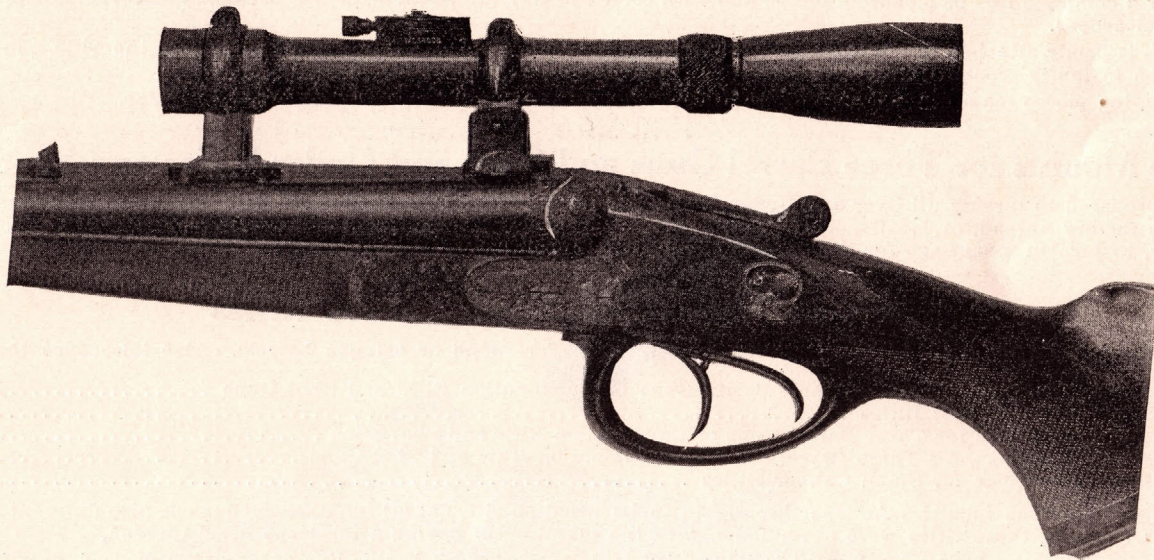

The Focus can be altered to suit. The Telescope can be instantly adjusted to the rifle, or as quickly removed by simply pulling the release. The ordinary sight can be seen and used (through the apertures in the Telescope mounts) when Telescope is on the rifle.

The whole field can be seen when the eye is about four inches from the eyepiece, thus avoiding all risk of receiving a blow from the Telescope when rifle recoils.

Genuine Mauser Factory Mounts

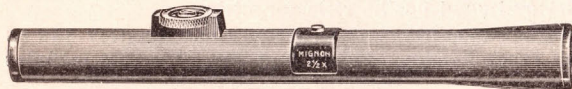

For Mauser Rifles we suggest whenever possible Genuine Mauser Factory Mounting—with all the advantages offered by the superior facilities to do the work and adjustments thoroughly during the trial shooting at the Mauser works.

Three-Barrel Combination Shot and Rifle Gun with Mounted Telescope

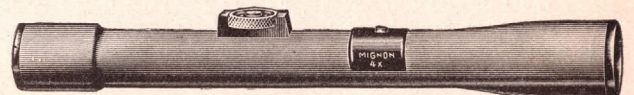

RIFLE TELESCOPES

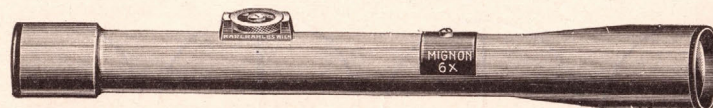

The Mignon rifle telescope is known as one of the best telescopes made and we carry a large stock of them.

Mignon 2½X

Mignon 4X

Mignon 6X

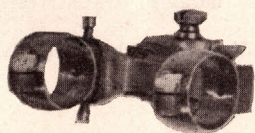

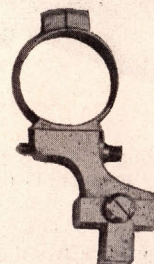

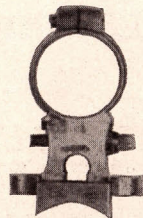

- No. 570—Mignon 2½ power for small caliber rifles. We recommend this telescope especially for target shooting. Price \$17.50

 No. 572—Mignon 6 power telescope for rifles and three barrel guns Price \$25.00

TELESCOPE MOUNTINGS FOR RIFLES, OVER AND UNDER COMBINATION RIFLE AND SHOT GUNS AND COMBINATION THREE BARREL GUNS

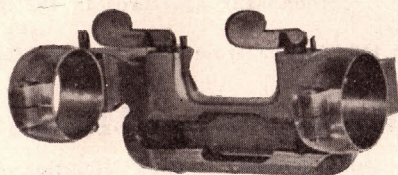

No. 550

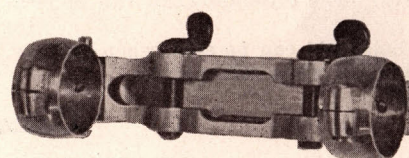

No. 551

No. 560

No. 556

No. 555

Telescope Mounting Pieces

We carry a complete line of mounting pieces and with their use any gunsmith with the necessary experience can mount any of the standard telescopes.

One piece is firmly attached to the telescope while the other or lower piece is securely fastened to the rifle. In this way the telescope can be instantly mounted or taken down. Adjustment can be made for windage and elevation.

Our mounting pieces make possible accurate telescope mounting and will stand all kinds of hard usage.

Telescope Mounts for Three Barrel Guns and Over and Under Rifles and Shot Guns

We are prepared to furnish all Over and Under Guns, also three barrel guns (Drillings) with any make telescope attached and adjusted at the factory abroad, or locally. We always recommend to have work done at the works where gun is built. We are prepared, however, to furnish mountings for this work to competent gunsmiths.

Telescope Mounts for Small Calibre Rifles

We can furnish for all small caliber Rifles telescope mounts—for round or octagon barrels. Also telescopes therefor.

No. 550—Telescope Mountings for Rifles, Three-Barrel Guns or Combination Rifle and Shot Guns	\$ 8.50
No. 551—Telescope Mountings for Rifles	\$ 9.50
No. 556—Telescope Mountings for Three Barrel Guns or Combination Rifle and Shot Guns	10.25
No. 556—Telescope Mountings, for Three Barrel Guns, or Combination Rifle and Shot Guns	\$14.75
No. 560—Telescope Mountings for Small Caliber Rifles	\$ 7.50

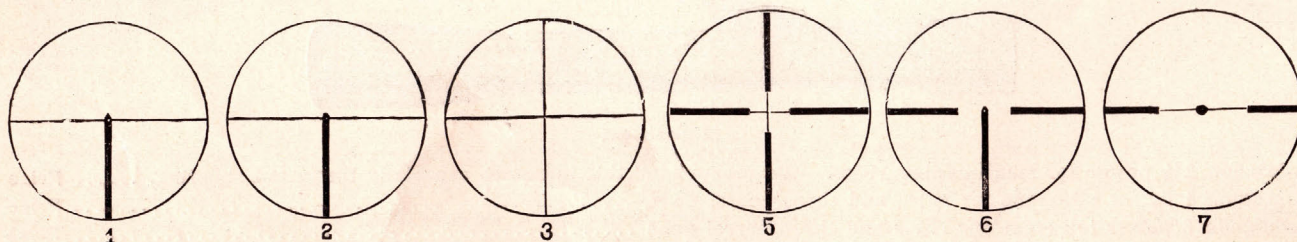

We receive numerous inquiries for sporting sights to be fitted on rifles of all the different makes, also different shaped barrels and systems. Of course, these rifles were never made with the intention of having a telescope fitted thereon.

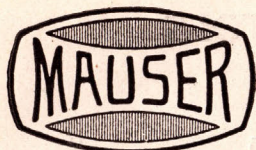

However, our telescope fitting department is in position to do correct work in this line on any rifle desired, only it is impossible to state definitely the prices for such work in advance because the work of fitting has to be done by hand and the conditions are different in almost every case.

We therefore suggest that you select a make of telescope from the above list and send us the rifle for fitting.

It is our experience that this work can be done wherever we can use regular stock mountings at a cost of approximately \$30.00. It is quite possible, where mountings have to be made by hand, that the prices may range between \$35.00 and \$50.00. This includes careful sighting and targeting.

The Mignon telescopes are fitted with one of the following reticules:

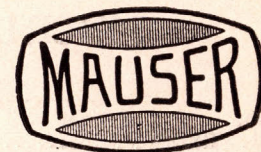

THE WORLD FAMOUS

Mauser Self Loading Automatic Pistols

(Manufactured by Waffenfabrik Mauser—Oberndorf a/n Germany)

WE ARE THE SOLE AUTHORIZED IMPORTER FOR THE UNITED STATES AND CANADA OF THE GENUINE MAUSER AND LUGER ARMS AND AMMUNITION

A COMPACT, ACCURATE, SAFE, AND TRUE WEAPON OF DEFENSE

Guaranteed at 10 yards to shoot in a 2-inch circle, at 25 yards in a 6-inch circle.

Pocket Models—.25 cal. (6.35 M. M.), 10 shots; .32 cal. (7.65 MM), 9 shots.

.25 Caliber and .32 Caliber

Uses Standard American and German Automatic Pistol Ammunition

DESCRIPTION

The component parts of the Mauser pistols are simple and strong and only the highest quality of materials and best workmanship are used in their manufacture, which is based on the same methods and principles to which Mauser constructions owe their world wide reputation.

Magazine Capacity. As the magazine of the 6.35 MM pistol holds nine and that of the 7.65 MM holds eight cartridges, the pistol can be made to hold ten and nine shots respectively.

Security in Handling. The shooter can tell when aiming or in the dark by touch, whether the pistol is cocked or not—when cocked, the rear end of the striker is visible at the back of the breech. This is a most valuable feature, as the absence of other pistols of devices clearly showing the state of the weapon, has led to fatal accidents.

The pistol cannot be fired when the magazine is wholly or partly withdrawn. Accidents due to presumption that there was no cartridge in the barrel after withdrawing the magazine are thus made impossible.

The breech remains open after firing the last cartridge, but closes automatically as long as there is a cartridge in the magazine. This gives greater security in handling.

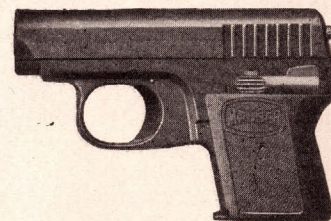

The **Safety**, which can be operated with ease by the thumb of the right hand when aiming, allows the weapon to be made safe when cocked or not cocked, loaded or not loaded, and, as the breech cannot be opened when the pistol is safe, danger in carrying is obviated, nor can those unacquainted with the mechanism, such as servants or children, make the pistol ready for fire.

The system employed for unlocking i. e., releasing the safety, prevents the safety from being unlocked while carrying the pistol in, or drawing it out of the pocket. The involuntary firing of more shots than intended, commonly known as "Maximing" is absolutely prevented by the interceptor which disconnects the trigger from the sear while the breech is in motion and makes it necessary to pull the trigger for each shot. No firing can take place unless the breech is entirely closed, even though one should forget to release the trigger after firing.

The **PISTOL IS Perfectly Balanced**, and its substantial and comfortable grip contributes greatly to the accuracy of shooting, which is further increased by the comparatively great length of the barrel, and line of sight.

PRINCIPAL FEATURES OF MAUSER AUTOMATIC

- | | |
|---|--|
| 1. Ten, nine and eight shots respectively. | 6. The state of the pistol, viz. cocked or not, is apparent externally. |
| 2. Solidity and simplicity of construction. | 7. Considerable penetrative powder. |
| 3. Perfect workmanship. | 8. Substantial grip and good balance. |
| 4. Great accuracy, increased by special length of barrel. | 9. Ease of taking apart for cleaning. |
| 5. Reliability and safety. | 10. Attractive appearance, absence of projecting parts, flat shape and consequent absence of bulge when carried in the pocket. |

THE MAUSER SELF-LOADING AUTOMATIC PISTOL

Famous The World Over

WE ARE THE SOLE AUTHORIZED IMPORTER FOR THE UNITED STATES AND CANADA OF THE GENUINE MAUSER AND LUGER ARMS AND AMMUNITION

**.30 CALIBER (7.63 MM) POLICE MODEL 1922, 3 $\frac{3}{4}$ -INCH BARREL; 10 SHOTS
RANGE 1000 YARDS**

DESCRIPTION

This arm occupies a very prominent part in the pistol world, being used for various purposes, such as a military arm (used by Germany, Russia, Italy, Turkey, Finland, China, etc.), as an efficient police weapon (regulation German police gun), as a target pistol and hunting arm. Special attention is called to its light weight, compactness, high degree of reliability and safety in handling. The weight of the pistol with wooden holster is only 3 $\frac{1}{2}$ lbs., and the length of the pistol in the holster is only 14 inches. This makes it an ideal weapon to carry around for hunting, being slipped into the coat pocket. It is used by many sportsmen all over the world for hunting game, such as deer, wild boar, wolves, bear, moose, etc. In the great war, the MAUSER played a very conspicuous part, just like the LUGER automatic pistol, having been used by Germany and other nations for sniping and general warfare, on account of its great accuracy, hitting power and long range. It is considered the STRONGEST HITTING and FARTHEST SHOOTING pistol in the world with a maximum range of about 2,000 yards.

THE OPERATION OF EXTRACTING the empty fired shells, the cocking of the hammer, the re-loading and closing of the action is done automatically, not by force of any part of the gases generated by the powder, but mechanically by the recoil. The barrel of this arm rests and slides on a track, and the recoil of the fired cartridge, which is utilized to automatically perform the functions of discharging the empty shells and reloading the weapon is hardly felt. This arm is accurate as a rifle, sighted up to 1000 yards, and has a very low trajectory. This arm can either be loaded with or without a clip of 10 cartridges. All parts are strong and simple and not liable to break or get out of order. There is not a screw in this gun and it can be taken apart for the purpose of cleaning, without the aid of any tools.

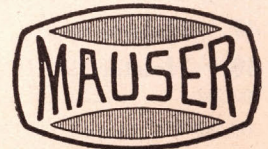

A skillful man can fire six or seven shots per second within the limit of the capacity of the magazine. Beyond this limit, when the magazine must be re-charged, a very skillful man can fire 120 unaimed or 80 aimed shots per minute. 10,000 shots have been fired at DIFFERENT times with a single pistol with no apparent deterioration. 2,200 shots were fired with one of these pistols, successively and without cleaning, the barrel being cooled after each 300 shots. In further tests, fine sand was strewn in the breech bolt, in the open magazine containing cartridges, and around the trigger and hammer, without interfering with the operation of any part of the mechanism.

The arm can be supplied with either 3 $\frac{3}{4}$ or 6-inch barrel, but owing to the terms of the peace contract the manufacture of the latter was forbidden. The pistol with 3 $\frac{3}{4}$ inch barrels are factory new and make a wonderful arm. The magazine has a capacity of 10 cartridges and can be loaded singly by hand or 10 at once from a clip. This pistol has a 1000 yard sight.

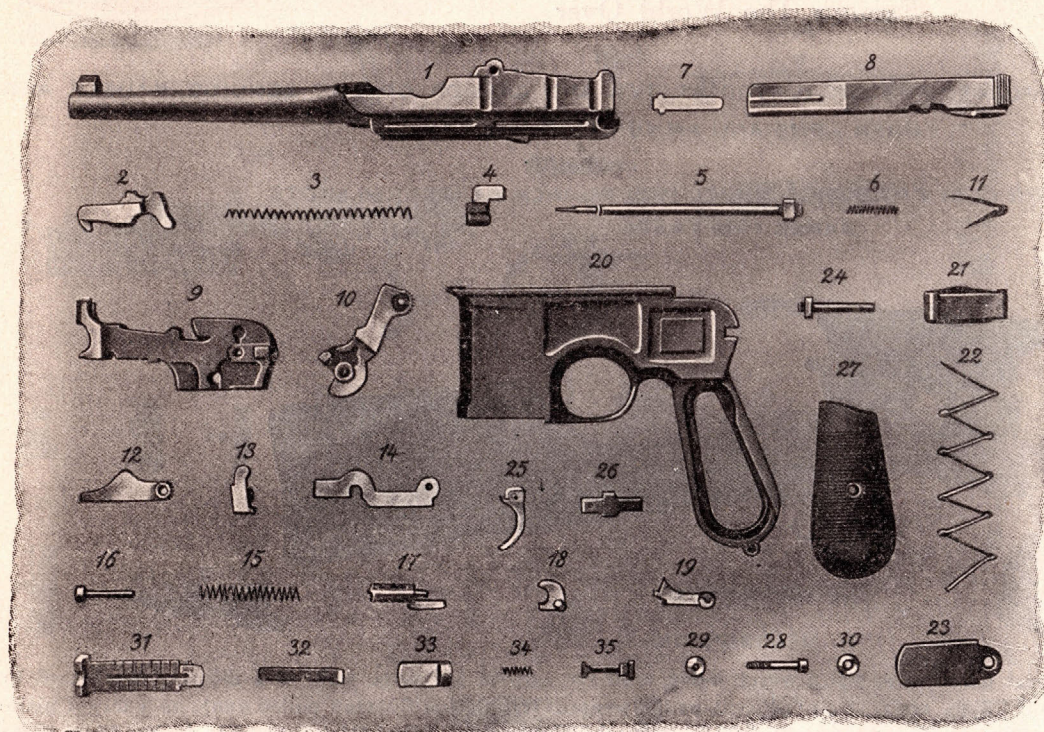

No. 710—Pistol complete, with wood Holster, 3 $\frac{3}{4}$ -inch Barrel (Cal. 7.63 M/M) new Price, \$50.00

ORIGINAL GERMAN "LUGER" (PARABELLUM) AUTOMATIC PISTOLS

.30 CALIBER (7.65 MM)—3¾ INCH BARREL—9 SHOTS

USED ALL OVER THE WORLD—POWERFUL, ACCURATE, SAFE

LATEST MODEL, RANGE 1800 YARDS

WE ARE THE SOLE AUTHORIZED IMPORTER FOR THE UNITED STATES AND CANADA OF THE GENUINE MAUSER AND

LUGER ARMS AND AMMUNITION

30 Cal. 3 3/4 in. barrel.

Shoots Standard
American and Ger-
man Ammunition

DESCRIPTION

The Luger automatic pistol has been used all over the world since 1900 and has proved in practical use to be most reliable in every respect as an ordnance, police and sporting arm. It has been accepted as a standard military arm by Germany, Switzerland, Portugal and Bulgaria. In the United States, Brazil, Holland, Canada and Russia, large numbers have been bought for the troops. The Luger was used in very large quantities by both sides in the World War. Ask a war veteran what he thinks of a

Luger. It has become a favorite with motorcycle policemen in pursuing and rounding up automobile bandits on account of its enormous penetration in sheet iron (1-3 inch), its great accuracy and long range.

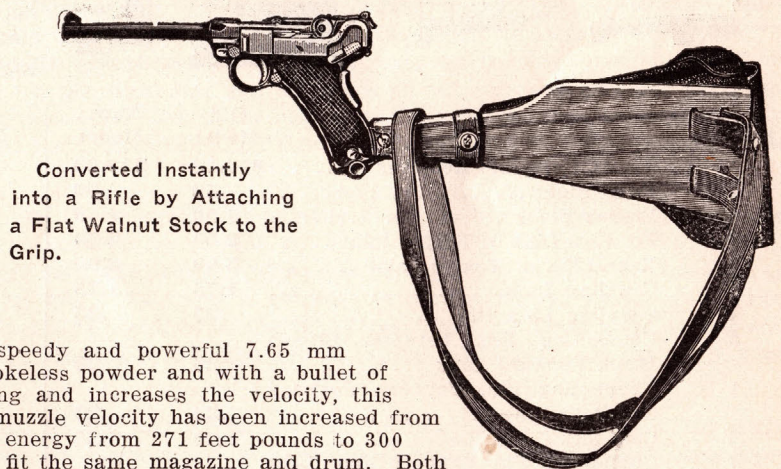

The Luger automatic pistol belongs to the recoil fire-arms with breech lock remaining fixed while the projectile passes through the barrel. In this way, no gases can escape; they maintain a uniform full pressure upon the projectile. The breech mechanism corresponds in principle to the world famous Maxim machine gun. The unique toggle joint lever mechanism provides an absolutely secure safety lock. The construction of the cartridge extractor allows the shooter to see and feel from the outside whether or not a cartridge is in the chamber—an important advantage. The magazine can be ejected by pressing a button. When

the last shot has been fired, the breech remains open, showing the gun is empty.

The new models can be converted instantly into a rifle by attaching a flat wooden stock to the grip. This enables the shooter to steady his arm for long range shooting. The 9 mm models with 6 and 8 inch barrels, can be equipped with a combination leather holster stock and shoulder straps. Such an outfit is ideal for hunting, being light in weight, compact, accurate as a rifle, and with plenty of power for killing such game as deer, wolves, large snakes, bear, mountain lion, etc.

LONG BARRELS

Barrels of both 7.65 mm and 9 mm caliber pistols are interchangeable. The threads of the barrels are alike; the same receiver will take the 7.65 mm and 9 mm caliber barrels. When a 9 mm caliber barrel is used in a Luger where formerly a 7.65 mm caliber barrel was used, it will also be necessary to use a 9 mm caliber recoil spring and vice versa. We do expert repair work on Lugers and fully guarantee our work. We supply long barrels 9 mm,—6, 8, 10, 12 and 16 inch barrels. Our charge of unscrewing a barrel, putting in another, lining it up and testing the gun with cartridges is \$1.75.

Converted Instantly
into a Rifle by Attaching
a Flat Walnut Stock to the
Grip.

IMPROVED CARTRIDGES

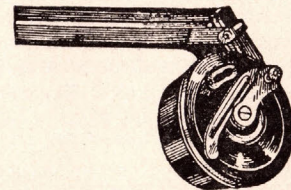

German ammunition companies have perfected a new speedy and powerful 7.65 mm LUGER cartridge. Loaded with 5.4 grains of Rottweiler smokeless powder and with a bullet of 92.6 grains, jacketed with an alloy which prevents metal-fouling and increases the velocity, this cartridge has attained results unexcelled by any others. The muzzle velocity has been increased from 1148 feet per second to 1208 feet per second and the muzzle energy from 271 feet pounds to 300 feet pounds. The 7.65 mm and 9 mm caliber Luger cartridges fit the same magazine and drum. Both cartridges are the same length but the difference is in the weights of the bullets and powder. The 9 mm bullet weighs 125 grains.

The point blank range of the 7.65 mm LUGER is 110 yards. The capacity of the magazine is 8 cartridges.

MAGAZINE DRUMS

An important feature of the LUGER pistol is that it can be converted instantly into a sub-machine gun by using a magazine holding 32 cartridges. The drum balances the pistol perfectly. The trigger must be pulled for each successive shot. When you order a drum send us your gun. The drum must be fitted to the pistol in order to correspond to the caliber. No extra charge is made for fitting. Drums can be loaded by hand, but it is advisable to use a special loading tool which can be supplied with the drum at an extra charge.

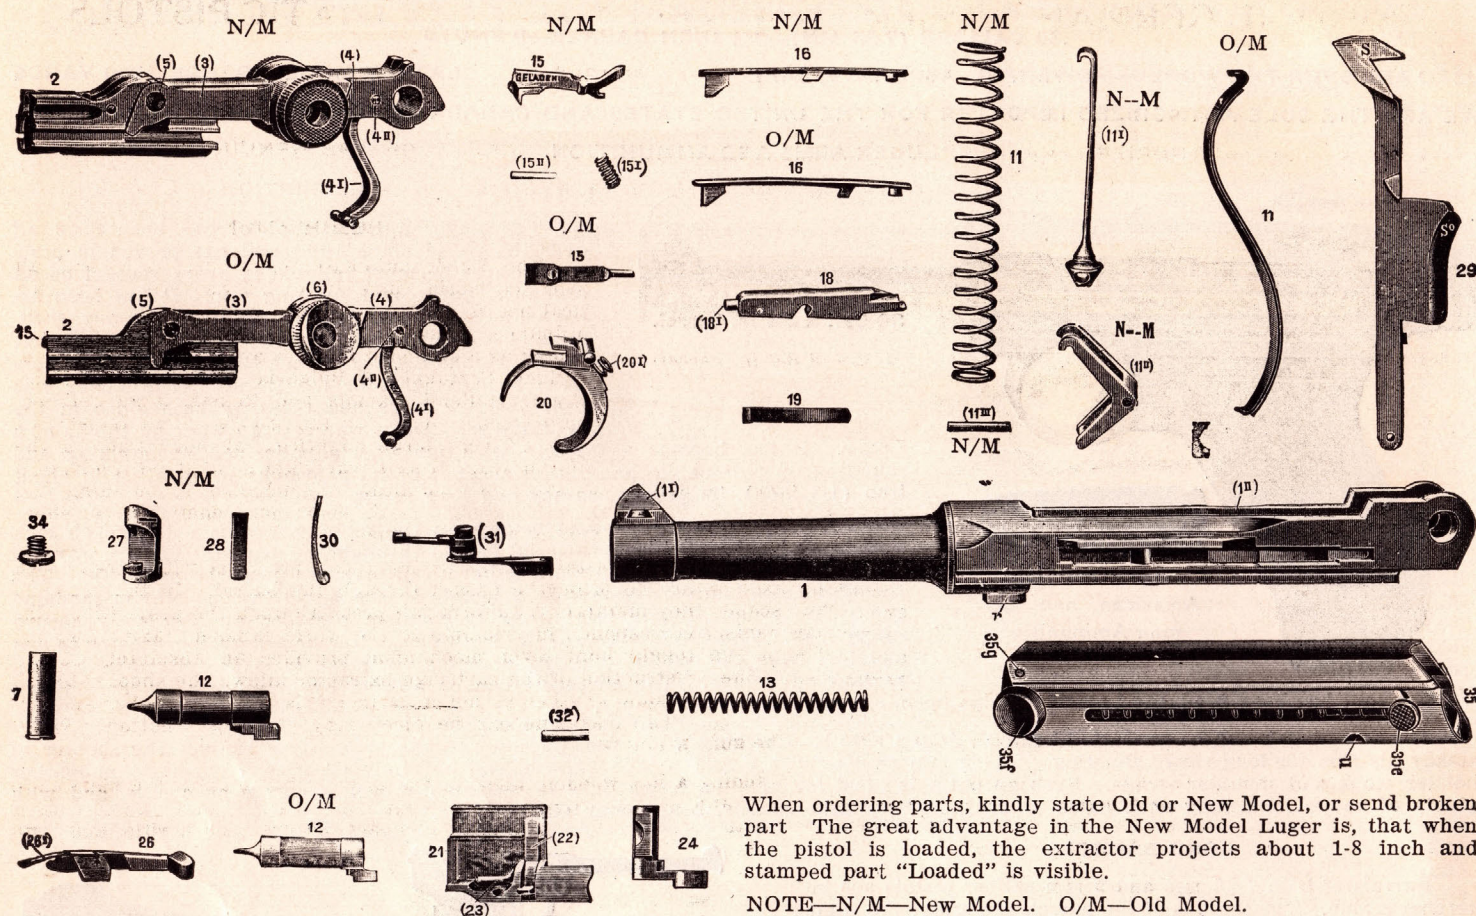

32 shot Magazine drum \$9.75

LIST OF PARTS FOR "LUGER" AUTOMATIC PISTOLS AND CARBINES

When ordering parts, kindly state Old or New Model, or send broken part. The great advantage in the New Model Luger is, that when the pistol is loaded, the extractor projects about 1-8 inch and stamped part "Loaded" is visible.

MERKEL BROTHERS OVER AND UNDER SHOT GUNS

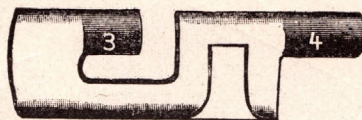

We present the American sporting world with what we sincerely believe is the shot gun of the future—The **“Over and Under”** Gun. The advantages of a shot gun with **“Over and Under”** barrels, as compared with old style double-barreled guns are considerable, making the increased cost to many a negligible consideration. For years unsuccessful experiments have been made, but not until Merkel Brothers brought out their new **“Over and Under”** System have these guns become so much in demand. The Merkel construction is now perfect—it is the handiest gun made—has a faultless lock and an absolutely safe system.—Opening and Closing of Barrels—cocking of lock proceeds with greatest ease and smoothness.

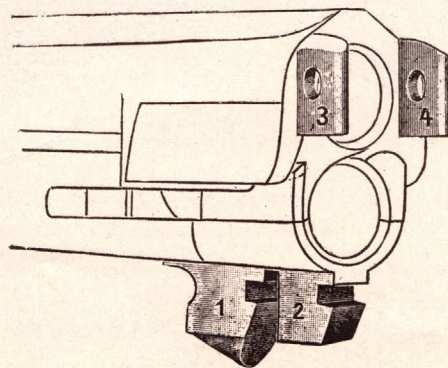

These **“Over and Unders”** are equipped with Greener double cross bolt (Kersten lock) and with double under bolts. Locks are placed in the System.

The best grade ejectors guarantee perfect functioning.

The manufacture of these **“Over and Under”** guns proceeds under our personal supervision in the most careful manner possible, and in the models on following pages.

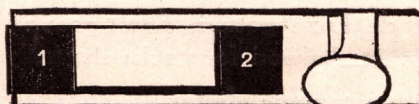

THE LOCK ON THE MERKEL OVER and UNDER

THE NEW PATENT RHEINMETALL 16-GAUGE AUTOMATIC SHOT GUN

No. 370—The New 16-Gauge, the Real Patent Automatic Shot Gun; 5 Shots (Not a Pump Gun)

GUARANTEED BEST GERMAN AUTOMATIC SHOT GUN

ADVANTAGES:

Most reliable working
Perfect shooting efficiency
Easy manipulation
Facility in dissembling and assembling
Clean workmanship
27½ in. choke-bore barrel
Holds five shells, Caliber 16 only

Weight about 7 pounds
Cheek piece and checkered pistol grip
Greatest durability
Insensibility to difference in shells
Retention of open breech after last shot
Direct trigger safety catch
Fine walnut stock

Barrel and breech are not only locked at the moment of firing, but both go back to their final position.

The "RHEINMETALL" Automatic Shotgun, by reason of its dependability and ease of operation, is conceded to be a remarkable gun for water-fowl, and field shooting. The trigger must be released and pulled each time the gun is fired, making it under the shooter's control at all times. After a shell has been fired, the empty shell is ejected, a loaded shell is carried from the magazine into the chamber, the hammer is cocked, leaving the gun ready to be fired again, with no effort on the part of the shooter.

The trigger must be pulled for each shot.

When the last shell has been fired the breech always remains open, showing that the gun is empty. It will always be reloaded if there is a shell in the magazine.

The take-down mechanism is simple, permitting the barrel to be easily removed and one of the different choke or length substituted.

The "Rheinmetall" Automatic Shotgun is protected against premature discharge in three ways:

One—When the barrel recoils (the breech closed and locked) the link prevents the hammer from coming in contact with the firing pin until the loaded shell is fully inserted and the breech again closed and locked.

Two—At the first opening movement of the breech, the firing pin is withdrawn by the locking-block and cannot touch the primer until the gun is again ready for firing.

Three—Before the breech is unlocked, the safety sear engages the trigger, making it impossible to snap the hammer before the breech is closed and locked.

THE SAFETY CATCH. conveniently located in the trigger guard securely locks the trigger and as the trigger is also the sear, the shell cannot be discharged.

THE BREECH BOLT. A very strong locking-block locks the breech bolt firmly against the head of the shell and prevents the shell from being ruptured.

BREECH REMAINS OPEN. The gun always reloads if there is a shell in the magazine and always remains open after the last shell is fired. The open breech shows that no shells are left in the gun.

DIRECTIONS FOR OPERATING

TO TAKE DOWN. Unscrew the magazine cap while holding the barrel and fore-end down so it will unscrew freely, then slide the barrel and fore-end forward and off.

TO PUT TOGETHER. Slide the magazine into the barrel guide on the barrel and enter the end of the barrel extension into the receiver; replace fore-end, then push the barrel back until the barrel extension is completely in the receiver; hold the barrel and fore-end down, which will compress the recoil spring; screw the cap down.

TO LOAD. Draw the breech bolt back with the projecting handle, drop a shell into the receiver and press the release button on the right-hand side. Then turn the gun over and hold in on the release button; this allows the carrier to be pressed down and the shells to be pushed into the magazine.

If you desire to remove the shell from the chamber, leaving the others in the magazine, turn down the lever on the front left side one quarter circle, which closes the magazine and holds the cartridges therein—then pull back breech block which will eject the shell from chamber and close breech. To load, draw back the breech block, put shell in chamber—push button on right and turn back lever on front left side to original position.

IMPORTANT

The greatest advantage of the gun is that during the explosion of the cartridge, barrel and breech block are safely bolted together. Both parts are connected and in this manner turned to their original position which guarantees the safe working of this arm.

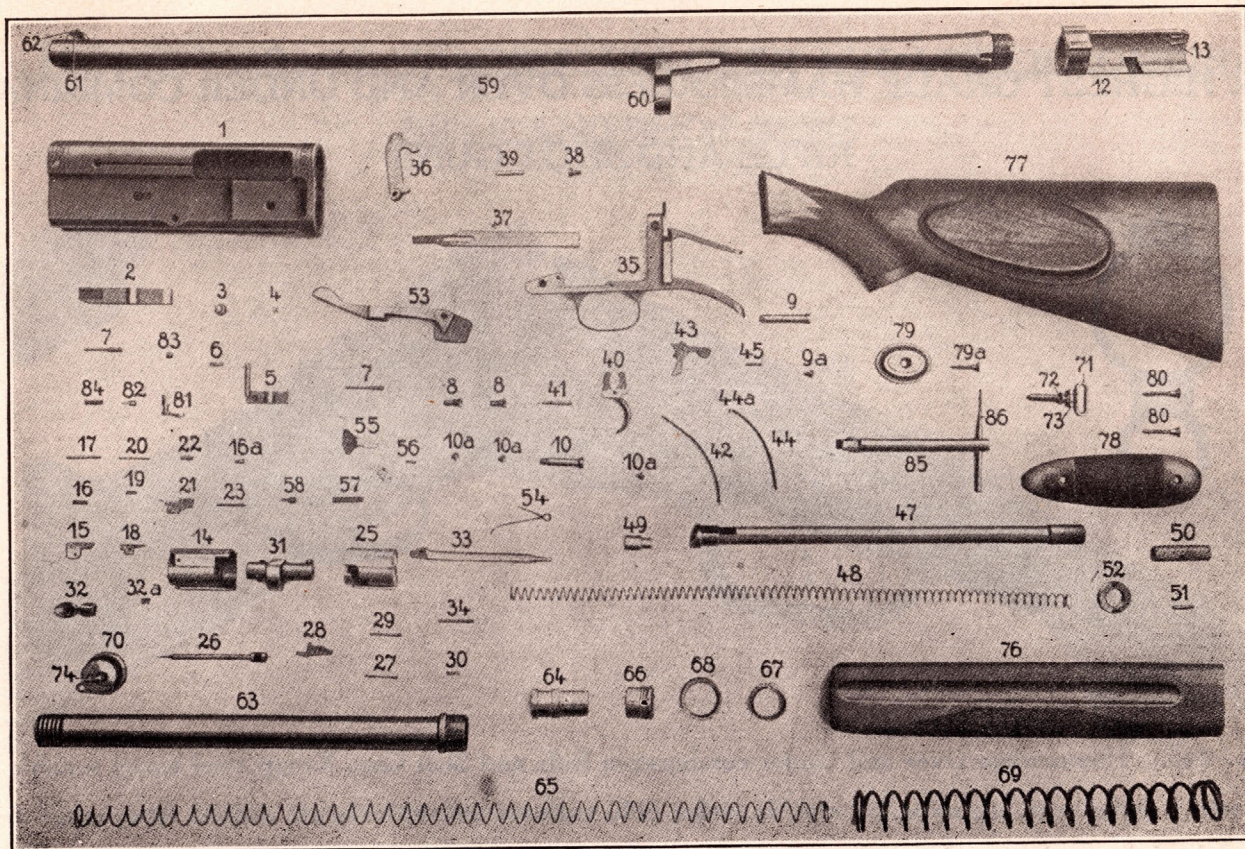

The barrel does not part from the breech block when the barrel returns to its original position, but only when the breech block is released by the carrier.

On account of the peculiar and modern construction of the gun, it is affected very little by the difference in the various loads of cartridges. It is therefore possible to use various kinds of cartridges now on the market, without causing inconvenience.

Use 2½ inch shells only and grease shells to prevent dampness or softening of paper shells when using them in automatic shot guns.

No. 370—Rheinmetall 16 gauge Automatic Shot Gun Price \$75.00

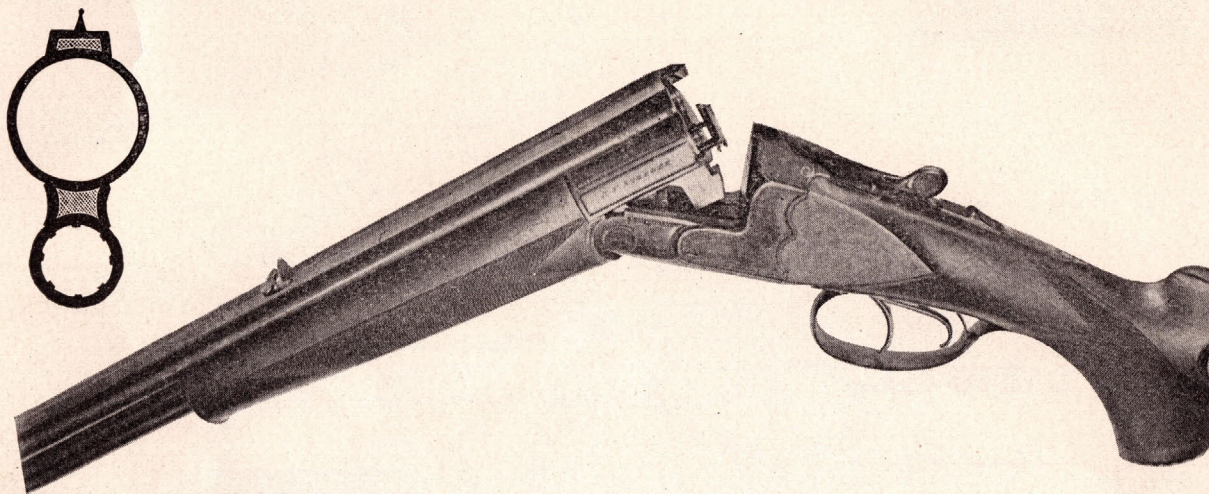

No. 371—Same, but barrel with matted rib Price \$87.50

MERKEL BROTHERS THREE-BARRELED GUNS

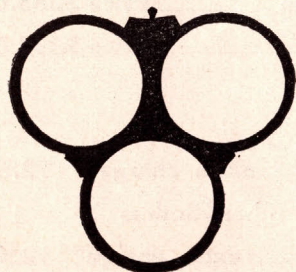

We present to the American Sporting World the original Three-Barreled ("Drilling") Guns which are the best in this style of Sporting Arms. The wonderful Original Merkel-Anson "Drillings"—2 shot barrels, any calibre, with rifle barrel preferably for calibre 30-30 Winchester underneath—are perfect in construction, safe, dependable and well balanced. These Three-Barreled Guns are far superior to anything offered, especially to those where the actions are located above the trigger plates, thereby unbalancing the gun as the action is too far in front. In our Genuine Merkel Three-Barreled guns, the action is nearly above the hand, which gives perfect balance.

Please remember this difference when competitors offer you cheaper three-barreled guns. In the Merkel-Anson "Drilling" the firing pins are one with inside hammer, securing thereby quick and safe action, also preventing rusting or breaking of firing pin, as the lock construction is placed in the system and not in the stock as in cheaper drillings. Merkel stock sides are stronger and possess a much stronger connection between stock and action, a quality much to be desired in this kind of gun.

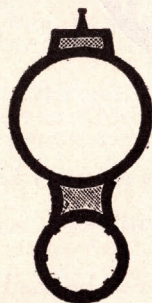

The barrels are of the celebrated Krupp fluid steel. Every barrel bears the proof marks that it has been tested and passed at the Merkel as well as the Government Proof-House.

L. C. SMITH GUNS

"FIELD GRADE"

This gun is especially designed for those desiring a gun for field and marsh where rough usage is required. The shooting powers of this gun can be relied upon to fully equal those of the higher grades.

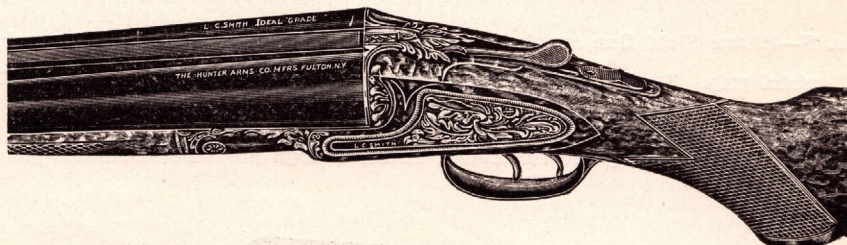

SPECIFICATIONS: Grip: Full pistol regular, half or straight to order. Barrels: 26, 28, 30 and 32-inch Armor steel only; bored any way you choose from a cylinder to a full choke. Gauge: 12, 16 and 20. Weights: 12 gauge, 6¼ to 8¼ lbs.; 16 gauge, 6 to 7 lbs.; 20 gauge, 5¼ to 6½ lbs.

PRICES:

Non-Ejector \$49.85 With Automatic Ejector \$62.60

"IDEAL GRADE"

This gun is a "General Purpose" weapon, a sound, reliable and thoroughly serviceable gun and with just enough engraving to make it attractive, as the illustration shows. The barrels are bored and finished with extreme accuracy and care. For general purposes it is far superior to any other gun offered at a similar price.

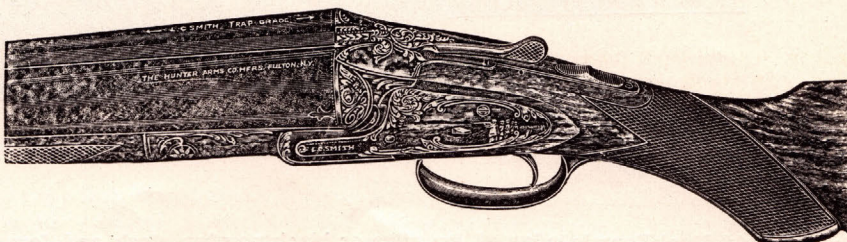

SPECIFICATIONS: Grip: Full pistol regular, half or straight to order. Barrels: 26, 28, 30 and 32-inch London steel, bored any way you choose from a cylinder to a full choke. Gauge: 12, 16, and 28. Weights: 12 gauge, 6¼ to 8½ lbs.; 16 gauge, 6¼ to 7 lbs.; 20 gauge, 5¼ to 6½ lbs.

PRICES:

Non-Ejector \$59.50 With Automatic Ejector \$73.50

"TRAP GRADE"

In the production of this grade particular attention has been paid to meet the requirements of sportsmen who are desirous of a gun for trap shooting, as well as for field, with all the latest attachments—Hunter One Trigger and Automatic Ejector especially—and at a very low price. Each lock-plate is engraved with a trap shooting scene consisting of a trap house and a squad of five shooters at the score. We can confidently recommend this grade as entirely satisfactory, especially for the purpose the name implies. With our special system of boring, no better guns are made than the L. C. Smith Double Gun with Hunter One Trigger.

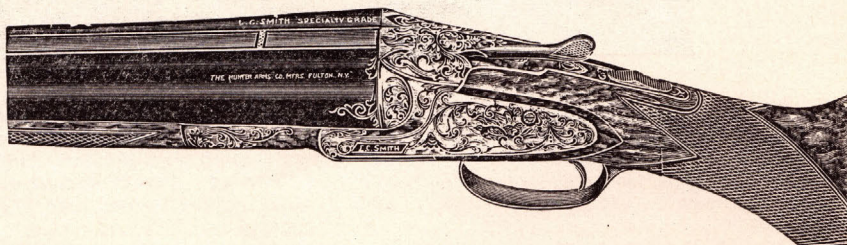

SPECIFICATIONS: Grip: Full pistol regular, half or straight to order. Barrels: 26, 28, 30 and 32-inch Crown steel, bored any way you choose. Gauge: 12, 16 and 20. Weights: 12 gauge, 6¼ to 8½ lbs.; 16 gauge, 6¼ to 7 lbs.; 20 gauge, 5¼ to 6½ lbs.

PRICES:

Non-Ejector \$ 75.00 With Automatic Ejector \$ 89.60
Non-Ejector with Hunter One Trigger 103.75 With Automatic Ejector and Hunter One Trigger 118.35

"SPECIALTY GRADE"

A fine gun in all details, built to last a lifetime. Handsomely engraved, as shown in the illustration, with fine lines of the best weapon and at a most moderate price. A thoroughly sound, serviceable gun, well fitted. Every attention has been paid to produce in this our Special Grade a well-balanced and good-shooting gun, and we have every confidence in recommending it to sportsmen who are desirous of having a high quality gun.

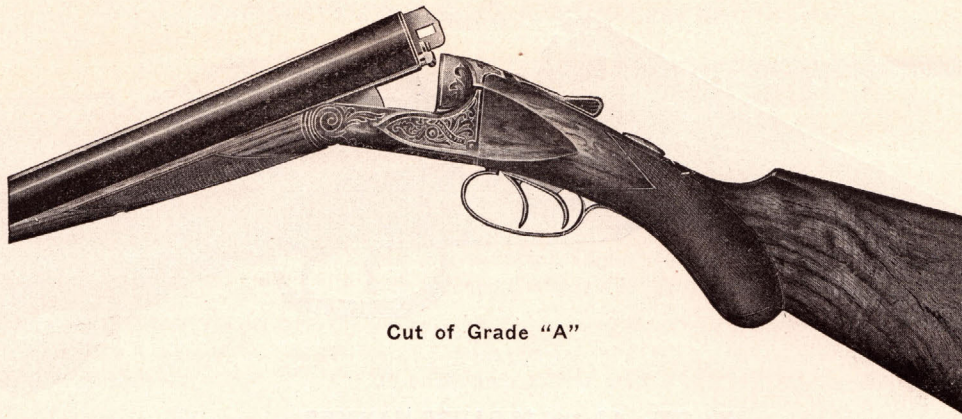

SPECIFICATIONS: Grip: Full pistol regular, half or straight to order. Barrels: 26, 28, 30 and 32-inch Nitro steel, bored any way you choose. Gauge: 12, 16 and 20. Weights: 12 gauge, 6¼ to 8¼ lbs.; 16 gauge, 6¼ to 7 lbs.; 20 gauge, 5¼ to 6½ lbs.

PRICES:

Non-Ejector \$ 94.00 With Automatic Ejector \$108.50
Non-Ejector with Hunter One Trigger 127.75 With Automatic Ejector and Hunter One Trigger 140.00

WINCHESTER REPEATING SHOTGUNS

WINCHESTER MODEL 12, HAMMERLESS SHOTGUN

Six Shots, Nickel Steel, Light Weight
Plain Finished Model 12—12, 16 or 20 Gauges

Price\$54.25

12 GAUGE
26, 28, 30 or 32-inch Barrels

16 GAUGE
26 or 28-inch Barrel only

20 GAUGE
25, 26 or 28-inch Barrel only

As the illustration indicates, this latest model Winchester presents the acme of grace and symmetry from butt plate to muzzle. In graceful curve and refinement of finish no other repeater approaches it. No screws nor pins project to catch the dirt or injure the hands.

The stock is finely proportioned, the receiver is matted along the line of sight, while the slide-handle is slightly tapered and fits the hand comfortably.

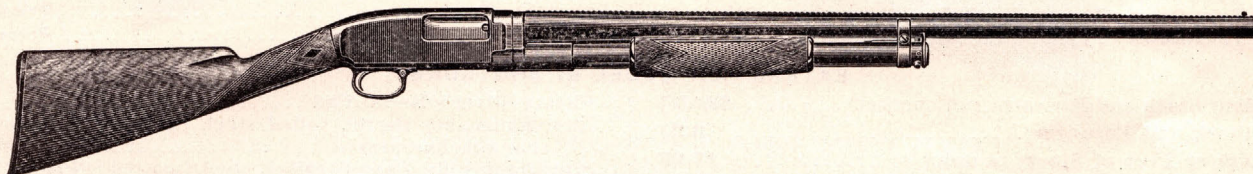

The gun separates into two parts quickly and easily. No tools are required and no small parts are released to be lost. The safety is of the cross bolt type, located in the guard, and cannot be jarred out of place by the recoil. Interchangeable barrels of different choke or cylinder bore can be furnished but in all cases must be fitted at the Winchester armory.

12 GAUGE

WINCHESTER MODEL 12 TRAP GRADE

1912—12, 16 or 20 gauge "Trap" Grade (write for description)Price, \$101.00
1912—12 gauge only, "Tournament" Grade (write for description)Price, 82.25

WINCHESTER TRAP GRADE WITH VENTILATED RIB

Trap Grade with Ventiladed Rib, Extension Slide Handle and Soft
Rubber Recoil Pad. 12 Gauge, 6 Shots

Model 12—Trap Grade, Vent. Rib (write for description)Price, \$181.25
Model 12—Tournament Grade, Vent. Rib (write for description)Price, 165.00

This rib is finely made throughout and is not brazed or soldered on the barrel, but is mechanically locked to it.

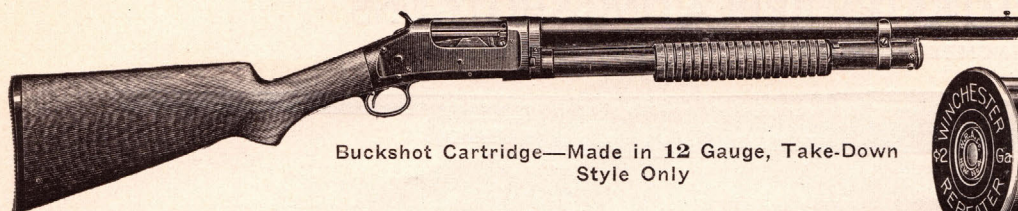

The Winchester Ventiladed Rib bridges the area of heat waves and is raised above the barrel to a scientifically correct elevation. It is designed especially to give speed and accuracy in sighting and shooters will find its matted surface very helpful in fast shooting. Because of the construction of this rib, the expansion and contraction of the barrel, due to heat caused by frequent firing, cannot cause the rib to take a permanent set.

The Trap stock being hand-made, any length or drop can be furnished without increase in price. Interchangeable Nickel Steel Barrels, full or modified choke, or cylinder bore, can be furnished in 12, 16, or 20 gauge. A gun with an action of one gauge cannot be fitted with an interchangeable barrel of a different gauge. In all cases, extra barrels will have to be fitted at the Winchester armory.

WINCHESTER REPEATING SHOTGUNS

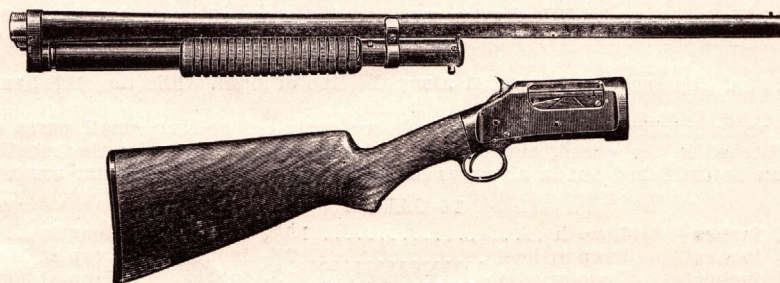

Buckshot Cartridge—Made in 12 Gauge, Take-Down Style Only

Buckshot Cartridge

The Winchester Model 97 "Riot" gun is made with a 20-inch rolled steel cylinder bore barrel, bored expressly to shoot buckshot. These guns are used by sentries in the U. S. Army, express messenger, watchmen, prison guards, train hands, and by many people for home defense. They are far superior to a revolver for shooting in the dark, where aim is uncertain, as a buckshot cartridge contains nine bullets to one contained in a revolver cartridge. The "Riot" Gun has the same action as the regular model 97. The magazine holds five cartridges, which, with one in the chamber, makes a total of six at the command of the shooter Price, \$46.00

WINCHESTER "TAKE-DOWN" REPEATING SHOTGUNS

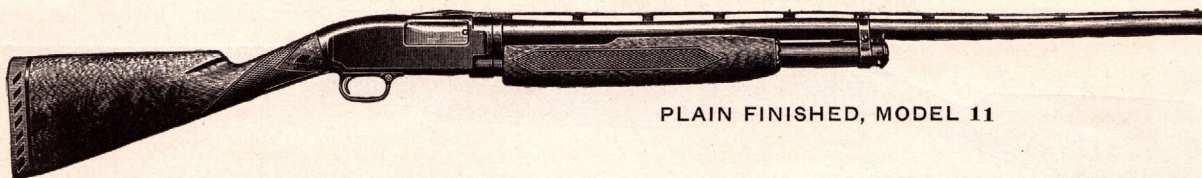

Model 97, "Take-Down"—Take-down, rolled steel barrel, 12 gauge; 28, 30 or 32 inches; pistol grip stock and fore-end of plain wood, not checked, full choke-bore. Weight about 7¾ pounds Price, \$46.00

WINCHESTER RIFLES

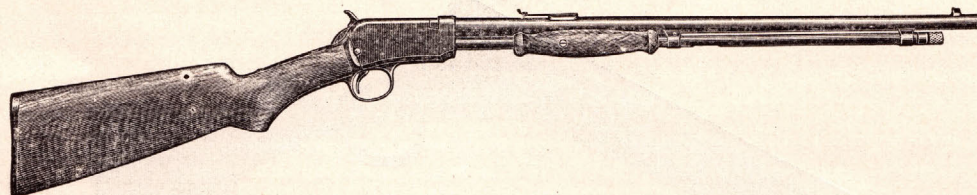

WINCHESTER REPEATING RIFLE, MODEL 06

Extra Light. For .22 Short, .22 Long, and .22 Long Rifle Rim-Fire Cartridges

Model 06—The Winchester Model 06 is a compact, light-weight, take-down rifle handling .22 short, .22 long and .22 long rifle rim-fire cartridges. It is attractive in appearance and outline, and in accuracy, reliability of operation and finish it is up to the established Winchester standard. The repeating and take-down systems used in this rifle are simple, positive, and thoroughly tried, having always given entire satisfaction. This rifle is made with a 20-inch round barrel, fitted with a sporting front sight and an adjustable open rear sight. It measures 35 3-4 inches over all and weighs about 5 pounds; has a handsome straight grip stock 12 7-8 inches long, with a drop at comb of 1 5-8 inches and at heel of 2 3-8 inches, finished with a rubber butt plate. The magazine holds 15 .22 short and 12 .22 long or .22 long rifle cartridges. Model 1906 rifles can be furnished only according to the above specifications. **Price \$21.50**

Sporting Rifle, Model 90, Plain Finished

24-Inch Octagon Barrel

A Model 90 rifle, chambered for the .22 short cartridge; will handle that cartridge only. A .22 long will handle the .22 long only, and so on. The name of the cartridge for which the gun is intended is stamped upon the barrel. Number of shots in the magazine: .22 short, 15; .22 long, 12; .22 long rifle, 11; .22 Winchester Rim-Fire, 12.

Model 90—Plain Finish **Price, \$24.75**

Model 90—Fancy finish, pistol grip, checkered **Price, 53.75**

WINCHESTER RIFLES

WINCHESTER AUTOMATIC RIFLES

Self-Loading, Model 03. .22 Caliber.

The Winchester Model 03 is a Ten-Shot Automatic, Hammerless, Take-Down Rifle, adapted to a new .22 Caliber Rim-Fire Cartridge loaded with Smokeless Powder and the Winchester Greaseless Bullet. It is simple in construction and operation, and is the first Automatic Rifle on the market. The Rifle has grace of outline, light weight, certainty of operation, ease of manipulation, and novelty of action, making a most desirable and up-to-date gun. Its loading without movement of the firer enables continued accurate aim and rapid discharge heretofore unknown, and only to be appreciated after trial.

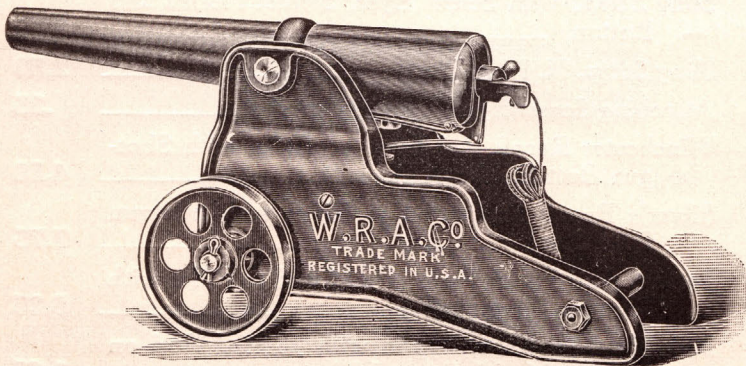

The Winchester Model 03 Automatic Rifle is made with Blued Trimmings, a Plain Walnut Stock and Forearm, not checkered, and a 20-inch Round Barrel, fitted with open Front and Rear Sights. Weight about 5 3-4 pounds. The Stock is 13 1-4 inches long. Drop at Comb, 1 3-4 inches; Drop at Heel, 3 1-4 inches; Length of Gun over all, 36 inches. Fancy Walnut Stocks and Forearms, and Plain or Fancy Walnut Pistol Grip Stocks, checkered or uncheckered, are the only variations from the standard gun that will be furnished.

Model 03 Winchester, .22 Caliber Automatic Rifle, 20-inch Round Barrel, Plain Walnut Stock and Forearm, not checkered Price, \$41.00

WINCHESTER BREECH-LOADING CANNON

For Saluting and Celebrating

This cannon has been designed to supply a general demand for a low-priced breech-loading cannon possessing safety, simplicity of construction, and ease of manipulation. All these desirable features are combined in this gun. In it can be used either paper or brass shells, and we recommend our .10 gauge Winchester shells loaded with 8 drams of black powder, with two Black Edge and one Card wad, to produce the loudest report. This cannon has so few parts that it cannot readily get out of order or cause any trouble in its operation. It can be easily dismantled, if necessary.

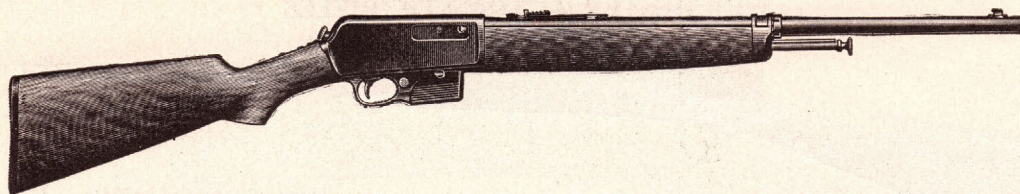

12-inch, .10 gauge, rolled steel, cylinder bore, blued barrel, cast iron frame. Weight about 14 pounds.

Price.....\$12.25

Blank cartridges, .10 gauge, 8 drams of powder. Price, per 1000 \$41.50

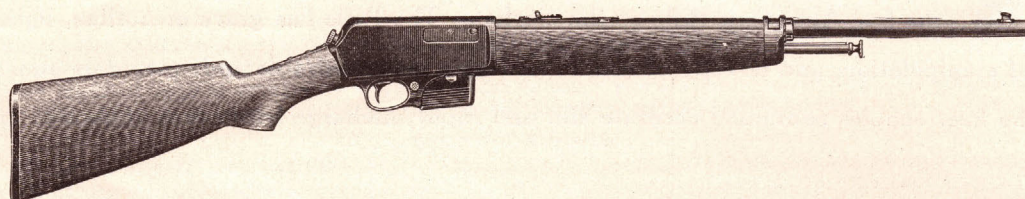

WINCHESTER SELF-LOADING RIFLE, MODEL 07

"Take-Down" Made for .351 High Power Winchester Self-Loading Cartridges. Plain Finished.

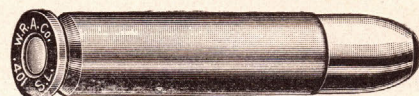

20-inch Round Nickel Steel Barrel, Plain Trigger, Pistol Grip; Stock of plain walnut, not checked. Weight about $7\frac{3}{4}$ pounds. Number of shots, 6, Price, \$57.50
 Extra Magazine, 5 shots Price, \$2.50 Extra Magazine, 10 shots Price, 4.00

THE NEW .401 CALIBER SELF-LOADING RIFLE, MODEL 10

This new Winchester shoots a heavier bullet and hits a harder blow than any other recoil operated rifle made. It is even more powerful than the .30 U. S. Army, of big game hunting fame. The loading and firing of this rifle are controlled by the trigger finger.

Round Nickel Steel Barrel, 20 inches long, "Take-Down," 5 shots, plain Walnut
 Pistol Grip Stock and Forearm, not checked. Weight about $8\frac{1}{4}$ pounds.

Price, \$57.50 .401 Caliber Cartridge with 200
 Extra Magazine, 4 shots Price, 2.50 Grain Soft Point Bullet
 Fancy Stocks, checked or unchecked, or Stocks of special dimensions, can be furnished on Models 07 and 10 at special price.

QUACKENBUSH AIR RIFLES

QUACKENBUSH AIR RIFLE NO. 7

Shoots .175-inch diameter Darts, Slugs and Air Rifle Shot. .175-inch diameter. Full length 38 inches. Weight 2½ pounds.

These guns are finished in gun metal black and constructed so as to permit taking apart readily. Can be knocked down instantly for packing in a suit case by merely unscrewing one thumb nut. Gun is cocked and loaded similar to the No. 1. All parts are of steel, except inner brass barrel and walnut finish stock. Gun is fitted with plain sights, rear being adjustable sidewise; Pull of trigger is also adjustable. Each gun is neatly boxed with six steel darts, three fancy paper targets and wiping rod.

Quackenbush Air Rifle No. 7Price, complete, \$7.50

QUACKENBUSH AIR RIFLE NO. 1.

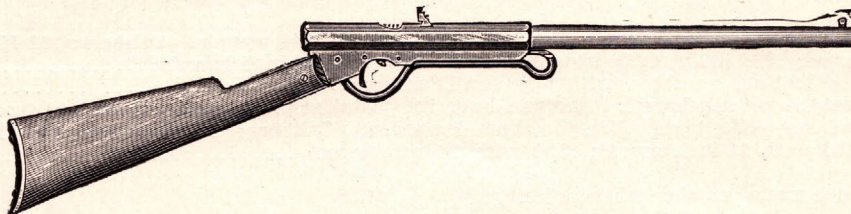

Shoots .210-inch diameter Darts or Slugs. Full length 36 inches. Weight 3¼ pounds.

These guns are finely constructed of the best material, and are nickel plated and highly finished. They are simple in operation and can be quickly taken apart for cleaning or inspection. Gun cocks by simply pushing in the barrel. Loads at breech. This gun has a strong, highly tempered spring and accurately fitted piston, adjustable trigger pull and open sights. It loads easily and quickly and is pleasant to operate. Each gun neatly boxed with six darts, six paper targets, 100 felted slugs, dart claw, wrench and wiping rod.

Quackenbush Air Rifle No. 1Price, complete, \$12.00

QUACKENBUSH AIR RIFLE NO. 9

Shoots .175-inch diameter Darts or Slugs. Full length 36 inches. Weight 3¾ pounds.

This gun is beautifully nickel plated and of the best construction throughout same as the No. 1. It is similar to the No. 1 except barrel is heavier and is held in the frame by a spring guard, the drawing down of which permits barrel, piston and main spring to be instantly removed. Being heavier, it is preferred by some to the No. 1. The No. 9 gun has adjustable rear sight, strong and highly tempered main spring, accurately fitted piston, adjustable trigger pull, etc. It is a good shooter, loads easily and will stand a lot of hard knocks. Each gun is neatly boxed with six patent darts, six paper targets, 100 felted slugs, dart claw and wiping rod.

Quackenbush Air Rifle No. 9 Price, complete \$14.00

DAISY AIR RIFLES

"LITTLE DAISY"

No. 20—Little Daisy

No. 20. Single Shot. Made entirely from steel, blue finish and fitted with black walnut stock. Designed to meet the demand for an Air Rifle smaller and lighter than the No. 12 Daisy. Length, 29 inches. Weight, 1 lb., 2 ounces. One dozen in a case. Weight 16½ pounds Price, \$0.90

DAISY SINGLE SHOT

No. 12. Lever Action Single Shot. Blue finish Shooting barrel removable and shoots either Air Rifle shot or 17-100 darts. Length, 31½ inches. Weight, 1 pound 12 ounces. One dozen in a case. Weight, 29 pounds Price, \$1.50

DAISY REPEATER

No. 11—Daisy Repeater

No. 11. Automatic Repeater with lever action. Magazine holds 350 shots. A very sturdy, gun-like Air Rifle that will appeal to boys and stay sold. Single-piece steel barrel, beautifully nickel-plated; stock of genuine black walnut. Length, 31½ inches. Weight, 1 pound 12 ounces. One dozen in a case. Weight, 29 pounds Price, \$2.00

500 SHOT DAISY

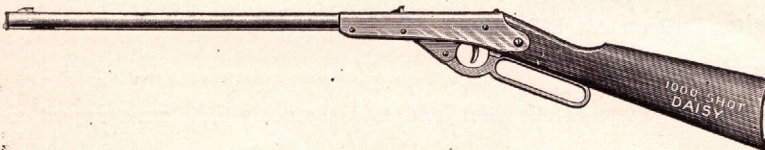

No. 30—500 Shot Daisy

No. 30. Automatic Repeater with lever action. Same construction, but blue finish, as the 1000-Shot Daisy, but the barrel is 3 inches shorter and the magazine holds 500 Air Rifle shots. Designed for boys wanting a high-grade repeater shorter than the No. 3. Length, 33 inches. Weight, 2 pounds 7 ounces. Half dozen in a case. Weight, 20 pounds Price, \$2.50

1000 SHOT DAISY

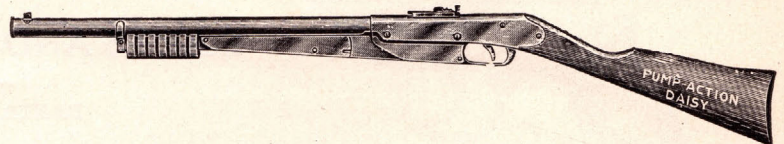

No. 3—1000 Shot Daisy

No. 3. Magazine Repeater, lever action. Magazine holds 1000 Air Rifle shots, and loads by operating the lever. Turned stock of genuine black walnut, highly polished. Metal parts beautifully nickle finish. Shoots with great force and accuracy. This rifle will please your most exacting customer. Length, 36 inches. Weight, 2 pounds 9 ounces. Half dozen in a case. Weight, 21 pounds Price, \$3.00

PUMP ACTION REPEATER

No. 25—Pump Action

No. 25. Operates by pulling the slide toward the stock. Fires rapidly from the shoulder, the magazine having a forced feed. Thirty shots per minute, at the will of the operator. A strong, and accurate shooter for men and boys. Metal parts in gun blue. Stock, genuine black walnut, hand polished. Adjustable rear sight. Magazine holds 50 Air Rifle shots. Take-down model, each in a box. Length, 38 inches. Weight, 3¼ pounds. Half a dozen in a case. Weight, 29 pounds Price, \$5.00

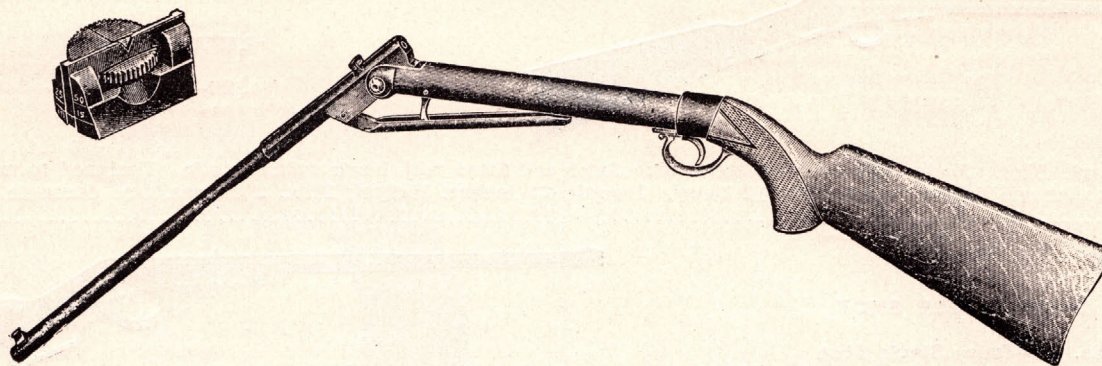

THE NEW MILITARY DAISY

No. 40—Military

No. 40... This rifle is a 50-shot repeater, lever action. All metal parts are finished in gun blue. Beautiful walnut stock finished stock. The rear sights are open and adjustable, the front sight is of the knife type. Length, 45 inches, including bayonet and sling strap. Weight, 3¼ pounds, each in a substantial box. Packed 6 in a case. Weight, 38 pounds Price, \$5.00

HIGH PRECISION AIR RIFLE

No. 975. Precision Air Rifle, 19 inch steel barrel with express boring, patent adjustable rear sight, to regulate very easy by hand for every distance, bead front sight, regulation screw for trigger, metal parts dark blued, checkered pistol grip, walnut stock. Loading and cocking by break down the barrel. Length overall 42 inches, weight about 6 pounds.

We recommend this rifle specially for target shooting.

Price, \$19.75

TATHAM'S BOY SCOUT AIR RIFLE SHOT

This Shot is made with especial care to fit most makes of Air Rifles. The tube is designed for pocket use, and by turning the band, the shot may be removed as wanted.

Tatham's Air Rifle shot is recognized standard of the world. It is of uniform size and absolutely round.

It has been used for many years and its volume of sale throughout the world is probably larger than the combined sales of all other so-called makes of Air Rifle shot.

The new tube in which it is marketed is especially designed for Tatham Air Rifle Shot.

There are over 250 pellets in each tube, weighing approximately 5 ounces.

The unique open band — our own design — is intended to prevent waste of the shot, and is a feature which must appeal to every user of an Air Rifle.

The tubes are packed 100 to the case; shipping weight 34 pounds.

"BABY" HAMMERLESS EJECTOR REVOLVER

This new model ejector is the simplest possible method of removing the shells from the cylinder and still retain the strength of the solid frame with all the conveniences of the swing out, without their disadvantages.

To remove cylinder, pull forward and sideways on base pin, which brings cylinder clear of frame, ejecting empty shell at the same time.

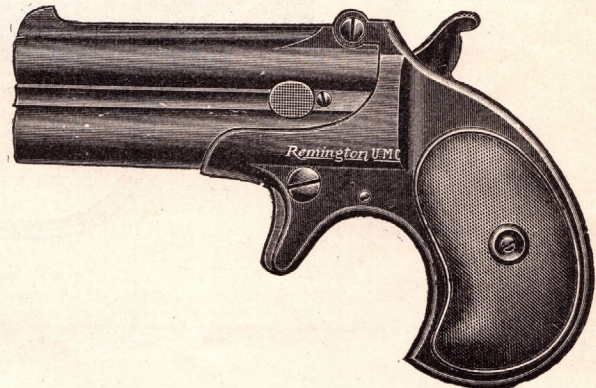

To replace cylinder, simply lay on frame and push into place. **SPECIFICATIONS:** Length over all, 4 inches. Weight, 6 oz. Hammerless, folding trigger; interchangeable parts, new one-piece main and trigger spring. Nickeled or Blue Finish. Rubber Stocks. Fully Guaranteed.

Price \$6.00

Extra for Pearl Stocks, per pair \$1.50

MODEL 95 DOUBLE DERRINGER

Chambered only for .41 Caliber Rim Fire Cartridges

SPECIFICATIONS: Two barrels, each carefully chambered and rifled, takes .41 caliber short rim fire cartridges, checkered rubber stock, blued finish. Weight, 11 ounces.

Price Each \$11.65

Extra for Pearl Stocks, per pair \$2.25 ..

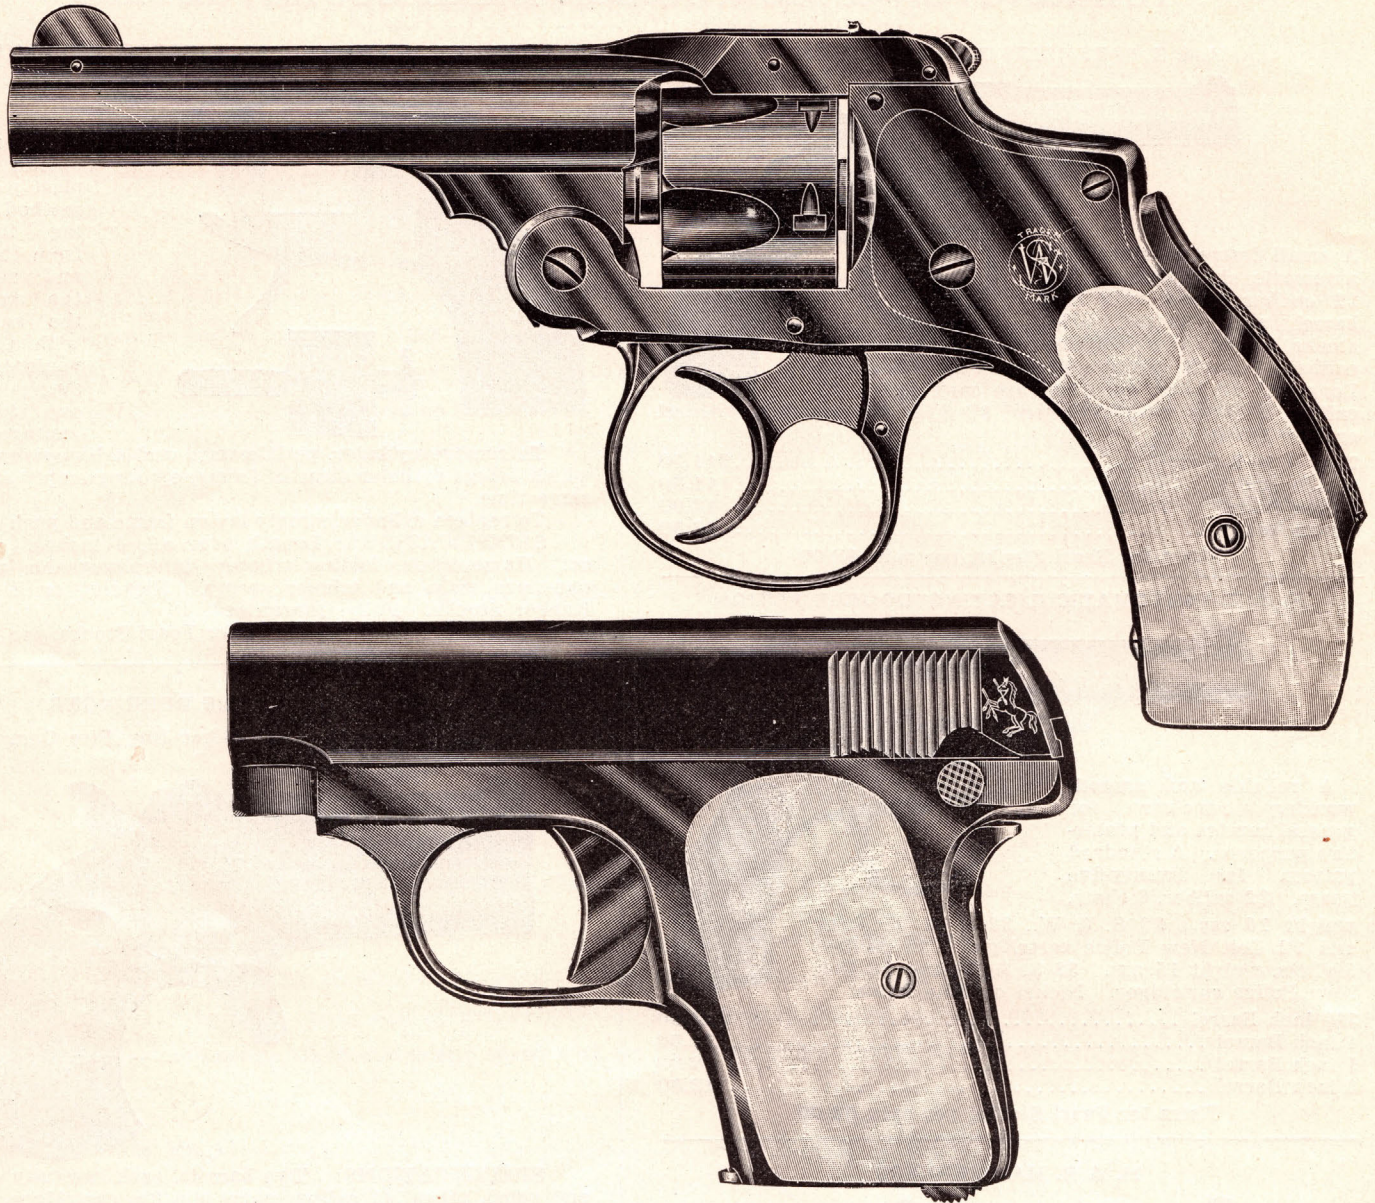

H. & R. "HANDY-GUN"

The new H. & R. "Handy Gun" is offered as a weapon of defence for the home, office and bank and as a small game gun for the hunter. Also for the automobilist for protection against "hold-ups."

The action and working parts are the same as used in "H. & R." Single Guns, noted for reliability, and will stand abuse that would put a revolver or automatic pistol out of commission.

SPECIFICATIONS: 20 Gauge, Steel Barrel, 8 and 12 1/4 in. Weight, with 8 inch barrel, 33 oz. 410 Gauge, Steel Barrel, 8 and 12 1/4 inch. Weight, with 8 inch barrel, 37 ozs.

MARBLE'S AND LYMAN SIGHTS

Complete for Every Purpose and Every Gun

MARBLE'S FLEXIBLE REAR SIGHTS

For All Standard American Rifles Except
Remington Model 12, 14, 16 and
24 Repeaters

Important Features and Advantages:

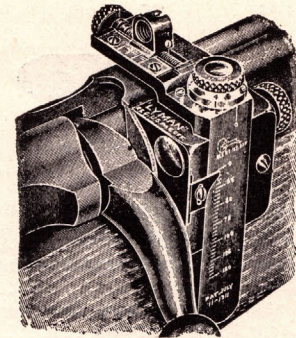

1st—Automatic Joint. Whenever the sight is struck in front or back, the coiled spring in the hinge returns it instantly into position for shooting. Can be locked down.

2nd—Advantage Over Receiver Sight. Can be used on rifles with long firing bolts to better advantage than Receiver Sight, being closer to the eye.

3rd—Elevation Lock. The lower sleeve, when turned up against the elevating sleeve prevents it from being turned and holds the disc stem true and rigid at any elevation.

4th—Interchangeable Discs. All Regular, Target, Sidelight, Snaphooter and Hunter Discs can be used.

State make, model and caliber when ordering \$4.00

No. 48—Lyman Micrometer Receiver Sight. Adjustable to minutes of angle for elevation and to quarter points for windage and suitable for both hunting and target. Equipped with Lyman Turn-Down Peep and threaded to take cup disc. Used extensively on Sporting Springfield Models, also Krag and Lee-Enfield.

No. 48-M—For guns having Mauser Receivers.

No. 48-B—Standard equipment on Springfield 1922 for National Rifle Association purposes, easily attached to Springfield 1903 rifle also.

Price, each, without disc \$11.00

With disc 11.50

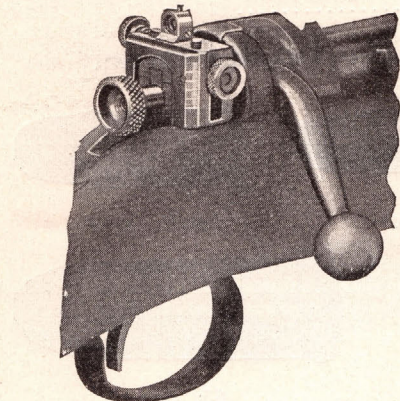

Tap and drill for mounting50

No. 1A—Lyman Combination Rear Sight, with Locking Feature and Built-in Turn-Down Peep. These are exclusive Lyman advantages. The smaller aperture built into the regular aperture prevents danger of losing it and gives two sizes of aperture always instantly available. Popular Hunting Sight easily mounted on the American Sporting Rifles. The locking feature insures sight being in proper position when firing. Price, \$4.50

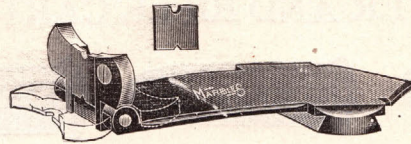

No. 2A — Lyman Combination Rear Sight similar to No. 1A furnished with detachable cup disc, but not turn-down peep feature. Desirable for target work. Price \$5.00

No. 54—Lyman Windgauge Receiver Sight for Savage Model 1920, .250/3000 and .300 caliber Rifle Price, \$5.50
With disc \$6.00
Tap and drill, Price, \$0.50

Gives extreme sight radius—used extensively by hunters.

MARBLE'S ADJUSTABLE LEAF SIGHT

No. 95L—For Winchester Rifles, .22 cal. Savage and .22 cal. Marlin Rifles, and Models 12, 14, 16, 24 and 25 Remington Rifles \$1.25

No. 95H—For Savages and Marlin H. P. Rifles 1.25

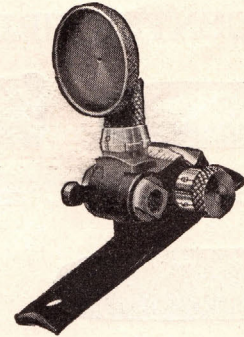

No. 95XH—For Savage 1920, Bolt Action Rifles 1.25

No. 95NRA—For Savage 1919, 22 N. R. A. Rifles 1.50

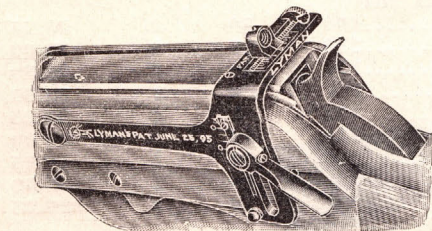

No. 95S—For Stevens Rifles 1.25

No. 95R—For Remington Auto. Rifles 1.50

The leaf of this sight is firmly held in position by the spring of the long flat part when either up or down, and can be easily put in either position.

No. 103—Lyman Micrometer Windgauge Combination Rear Sight. For small bore target shooting. Micrometer lateral and elevation adjustments so precise that the shooter can bring his second sighting shot accurately into the bull's eye. Easily mounted. Fits Stevens Favorite, Ideal, Savage 1919 and 1922, .22 caliber; Winchester 90, 52, 06, Single Shot, 92, 94, all calibers Price, \$9.00

No. 38—Lyman Windgauge Receiver Sight. Price, \$6.50
With disc, if desired Price, \$7.00

No. 21—Similar to No. 38, without windgauge Price, \$5.00

For Marlin 1893, Winchester 1886, 1894, and 1895. Used by shooters who prefer having the rear sight on the receiver rather than on the tang. Tap and drill for mounting Price \$0.50

No. 5—Lyman Combination Front Sight similar to 5B, with ivory post instead of bead. Either of these two sights, used with No. 2 or No. 2A Lyman Combination Rear makes a fine combination target and hunting equipment. Price, \$1.75

No. 5B—Lyman Combination Front Sight. Reversible globe and Ivory or gold bead. Price, \$1.75

MARBLE'S SHEARD GOLD SIGHT

For all rifles, revolvers and pistols. State make and model Each \$1.50

MARBLE'S STANDARD FRONT SIGHT

Ivory or Gold Bead

They are made for all American rifles in 1-16, 3-32 and 1-8 inch Ivory or Gold beads.

Standard Front Sight, each \$1.00

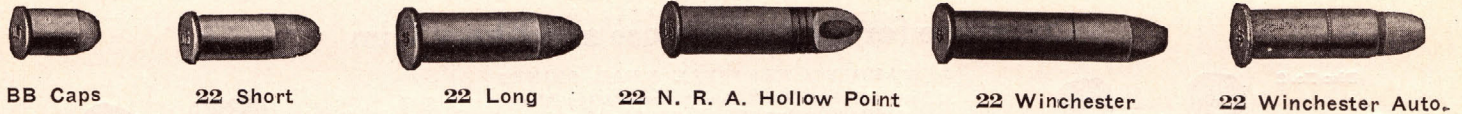

MARBLE'S SPECIAL SIGHTS

For Carabines. State caliber and model. Each \$1.00

For Luger Auto. Pistol Each \$1.00

*Or equivalent in Dense powder.

BUCKSHOT LOADS IN OTHER GAUGES

16 and 20 gauge Buckshot loads will be supplied in Ajax, if desired, but will carry the extra charge for loads not on the regular list.

LOADED SHOT GUN SHELLS—Romax

YACHT GUN (BLANK) SHELLS

(Loaded with Powder only)

	Per 1000
10 Gauge, 8 drams Black Powder	\$41.50
12 Gauge, 6 drams Black Powder	34.00

BASIS FOR ROMAX LIST PRICES, EXTRA CHARGES, ETC.

	Per 1000
10 Gauge, 4 drams powder or lighter, 1 1/8 oz. shot	\$43.00
12 Gauge, 3 drams powder or lighter, 1 oz. shot	37.00
16 Gauge, 2 1/2 drams powder or lighter, 7/8 oz. shot	36.25
20 Gauge, 2 1/2 drams powder or lighter, 7/8 oz. shot	36.25
28 Gauge, 1 3/4 drams powder or lighter, 5/8 oz. shot	33.50

HEAVIER LOADS

For heavier loads than those shown in above basis, add to the price per thousand the following:

For each 1/4 dram black powder	\$.75
For each 1/8 ounce shot	1.50

No deduction is made for powder or shot when either is lighter than given in the basis load.

For loads not listed in the preceding schedule of Romax Loaded Shells, add \$6.00 to the basis price from which the load is figured. The minimum quantity which will be supplied in any special load is 500 shells.

SIZES OF SHOT

For Chilled Shot add to the basis price \$3.00, plus \$6.00 for load not on standard list, making total of	\$ 9.00
For Buck or BB shot, not listed in preceding schedule add to basis price \$3.00 plus \$6.00 for load not on standard list, making total of	9.00
For Dust shot, add to basis price \$5.75 plus \$6.00 for load not on standard list, making total of	11.75
For 7 1/2 size shot add to basis price	6.00
No other half sizes supplied.	

HEAVIEST BLACK POWDER LOADS SUPPLIED

10 Gauge, 4 1/2 drams, 1 1/4 ounces shot.	
10 Gauge, 4 1/2 drams, 1 3/8 ounces shot. (Buckshot only.)

---	-------------------

LOADED SHOT GUN SHELLS

INSTRUCTIONS FOR ORDERING

In ordering Loaded Shot Gun Shells the load numbers shown in the preceding pages should always be used. In the load numbers for Ajax and Climax shells substitute for the letters US between the figures the letter designating the powder desired in accordance with the following table:

Bulk Smokeless Powder

DuPontD
ScheultzeS
Dead ShotDS
Hercules E. C.EC

Dense Smokeless Powder

BallistiteB
InfalibleL

The figures immediately following the powder letter indicate the gauge and grade of shell. The first figure identifies the gauge—1 being used for 10 gauge, 2 for 12 gauge, 6 for 16 gauge, 0 for 20 gauge, and 8 for 28 gauge. The second figure indicates the grade of shell—1 for Ajax, 2 for Climax and 3 for Romax.

The size of shot desired is shown by adding it to the load number and following it with the letter C if chilled shot is desired.

Bulk Smokeless powder is loaded by drams only. Dense Smokeless powder is loaded by grains only.

COMPARATIVE STRENGTH OF SMOKELESS POWDERS

The following table gives the number of grains different DENSE Smokeless Powders equivalent in strength to given measures of BULK Smokeless, or Black Powder:

Infalible 16 grs.	Ballistite 16 grs.	Equivalent in strength to Bulk 2 drams of Black or Smokeless Powder.			
18 "	18 "	2¼ "	"	"	"
20 "	20 "	2½ "	"	"	"
22 "	22 "	2¾ "	"	"	"
24 "	24 "	3 "	"	"	"
25 "	25 "	3⅛ "	"	"	"
26 "	26 "	3¼ "	"	"	"
28 "	28 "	3½ "	"	"	"
30 "	30 "	3¾ "	"	"	"
32 "	32 "	4 "	"	"	"
34 "	34 "	4¼ "	"	"	"

Loaded shells are packed in pasteboard cartons of 25; 500 shells to the case. Average weights for Loaded Shells are as follows: 10 ga Romax or Ajax, 65 lbs. per case; 12 ga. Romax, Climax or Ajax, 58 lbs. per case; 16 ga. Romax, Climax or Ajax, 55 lbs. per case; 20 ga. Romax, Climax or Ajax, 48 lbs. per case; 28 ga. Romax or Climax, 45 lbs. per case; .410 ga., 23 lbs. per case.

THE KOELN-ROTTWEIL TRAP AND HUNTING SHELLS

In offering these shells to the American shooting public, it is not our intention to compete with the American manufactured shells, which are both good and comparatively inexpensive. The cost of the Koeln-Rottweil shells is slightly higher than those of American make, but where a shell of the highest possible quality is desired and where cost is not the sole consideration, we confidently offer the Koeln-Rottweil shell as the shell "par excellence," and unexcelled for work either at the traps or in the field.

Just when the first shells with aluminum insertions were ready, a French trapshooter at Monte Carlo tried out—without our knowledge, our new shells against the best English and French shells. Then he wrote us the following letter:

Rottweiler Co.,

Gentlemen!

"In order to get a proper idea of the use of your shells stoppers and powder, I have carried through a long and expensive experiment, the results of which you receive herewith. I have used 4 serials of your shells with different loads, two serials with English shells, the rest with French shells. As I do not want to prejudice anyone, I shall not mention the names of the manufacturers of the other shells and stoppers; I shall mark them:

Letters BF for the French stoppers and J for the Iris stoppers
Letters DF for the French shells
Letters DA for the English shells

I hope it will be sufficient if I tell you that this ammunition is the most generally used in France.

The superiority of your shells is beyond a doubt. The strong interior aluminum insertion without any break in its activity forms a powder room of unchangeable dimensions and is held by the French Engineer Liouville to be the best known for leaf powder. Its thickness is sufficient to prevent the stopper on the powder from being blown up and positively prevent every compression through introduction of the stopper and the border. Your stopper is also excellent; it has the great advantage of finally simplifying the workmanship. Of your powder, I will say nothing; we are not permitted to use it. As far as your ammunition, shells and stoppers are concerned, I am sorry to say,—I use this expression with an eye on my own country,—that, as far as I know, nothing equal to it is to be found on the market at present. Their performance upon living pigeons absolutely proves my experience.

I give you permission to publish this result of my experiment and my opinion in the interest of shooters under the special condition that you make use of it without adding a single word that could offend your competitors."

I am, most respectfully yours, signed G. de Pernau.

The index of the shot results in question are at the disposition of all who may be interested. They are too numerous to be published here and show every plainly the great superiority of our ammunition as compared with others.

	Price per 1000
Rottweil Shells, C. & B. Smokeless, 12, 17 or 20 ga., Shot No. 1, 3, 5, 6 and 7	\$55.00
Rottweil Shells, Black Smokeless, 12, 16 or 20 ga., Shot No. 1, 3, 5, 6 and 7	\$65.00
Rottweil Shells, Red Smokeless, 12, 16 or 20 ga., Shot No. 1, 3, 5, 6 and 7	\$75.00
Rottweil Shells, Violet, Smokeless, 12, 16 or 20 ga., Shot No. 1, 3, 5, 6 and 7	\$75.00

The Rottweil Shells are 2½ and 2¾ inches long.

BUCK Shot should always be chambered in the MUZZLE
of a choke bore gun.

OPEN SEASONS FOR GAME, 1924-25

(Compiled by GEORGE A. LAWYER, Chief U. S. Game Warden, and FRANK L. EARNshaw, Assistant Interstate Commerce in Game, Bureau of Biological Survey.)

The Open Seasons Here Shown Include Both Dates... When the season is closed for a fixed period the date terminating the close season is given.

The seasons in certain counties of North Carolina may be had on application to the Legislative Reference Librarian, Raleigh, or Secretary, Audubon Society, Raleigh, N. C. Local exceptions in Idaho and Texas will be published in "Game Laws for the Season 1924-25."

Persons Should Consult Federal and State Laws in regard to sunset and sunrise provisions. The Federal law prohibits hunting migratory game birds from sunset to half an hour before sunrise, but some States further restrict the shooting hours.

The term "rabbit" includes hare, "quail," the bird known as "partridge" in the South; "grouse," includes Canada grouse, sharp-tailed grouse, ruffed grouse (known as "partridge" in the North and "pheasant" in the South) and all other members of the family except prairie chickens, ptarmigan, and sage hens; "introduced pheasant" is restricted to the Old World pheasants.

Persons Are Advised to secure from State game commissioners the full text of game laws in States where hunting is contemplated, as provisions of minor importance are omitted from this poster.

"Game Laws for the Season 1924-25," and a directory of game protection officials may be had free on application to the Secretary of Agriculture, Washington, D. C.

RECOIL PADS, ETC.

JOSTAM ANTI-FLINCH RECOIL PAD

No. 1650. This is a soft cushion of red rubber which is molded and vulcanized to a hard rubber base plate. Through the soft cushion are oblong holes which slant at an angle of 45 degrees in line with the stock. These holes take up the recoil and eliminate the upward whip of the muzzle. Attached to the stock by two screws, which are furnished with each pad. Directions for attaching furnished.

Small—5x1½ in. Each, **\$3.25**
Medium—5½x1¾ in. Each, **3.25**
Large—5½x2 in. Each, **3.25**

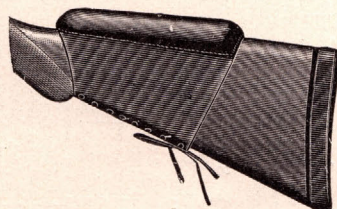

GOODRICH RECOIL PAD (Hard Rubber Back)

No. 1651. An enlarged air chamber hollowed out under the pad surface adds greatly to its cushion. Tough, durable, hard rubber base and soft rubber cushion are united almost inseparably by an especially compounded adhesive strip. Screws to gun stock firmly; no slipping; it's like part of the gun itself. Can be buffed easily to fit any gun butt.

Large—5¾x1⅞ in. Each, **\$3.50**
Medium—5½x1¾ in. Each, **3.50**
Small—5x1½ in. Each, **3.50**

ROWLEY CHEEK PAD

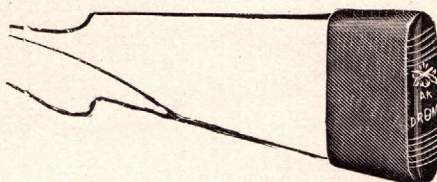

No. 1605. This pad protects the face and will fit any gun. Prevents flinching and will improve your scores. Made of fine leather to lace on stock.

Raises the comb ⅛ inch Each **\$3.25**
Raises the comb ¼ inch Each, **3.25**
Raises the comb ⅜ inch Each, **3.25**

SHOT GUN RECOIL PADS

Best Fitting Leather Pad Made

No. 1600—Made of the finest quality 4 inch cowhide, with elastic web. Padding composed of felt, which absorbs the shock. Once used, always used.

Price **\$1.85**

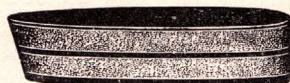

JOTSAM "SPONGE RUBBER" RECOIL PAD

No. 1652. Sponge rubber pads are the softest pads on the market. Made of high-grade sponge rubber in 1-, 2-, and 3-ply. At the base there is a strip of red sheet rubber, which is tacked and cemented to the stock, and the sponge rubber in turn is cemented to the red strip. Between the layers of sponge there are strips of red gasket rubber to give the pad body strength. These Pads are faced with soft, red sheet rubber. Special tacks furnished with each pad; also instructions for attaching.

Single-ply, ¾ in. thick Price, **\$1.50**
Two-ply, 1 in. thick Price, **2.00**
Three-ply, 1½ in. thick Price, **2.50**

JOSTAM "AIR CUSHION" RECOIL PAD

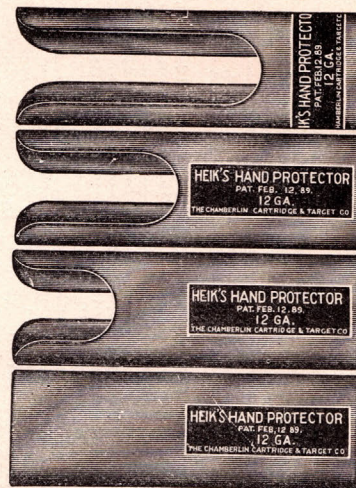

Silver Pattern

No. 1653. Constructed the same as all others of this type. Soft red rubber cushion and hard black base plate. Hollow cushion, chamber extending from toe to heel. Best grade of Para rubber used. Best pad of this type on the market.

Small—5x1½ in. Each, **\$3.00**
Medium—5½x1¾ in. Each, **3.00**
Large—5½x2 in. Each, **3.00**

THE HEIKE'S GUN HAND PROTECTOR

It fully protects the hand grasping the barrel from heated or very cold barrels. Cut represents Protector with and without under-cut. Covered with fine Morocco, quickly adjusted, 10, 12, 16 and 20 gauge.

No. 1660. 6-inch Protector, Each, **\$1.50**
No. 1661. 9-inch Protector, Each, **1.75**
No. 1662. 12-inch Protector, Each, **2.00**

AKRON RECOIL PAD

Most popular pad on the market. Best quality sponge rubber cushion securely cemented in boot of fine chrome leather. Laces tightly to stock; no slipping; nothing to catch.

No. 2—4¾ in. long, 1½ in. at widest point Each **\$2.00**
No. 3—5¼ in. long, 1¾ in. at widest point Each **\$2.00**
No. 4—5½ in. long, 1⅞ in. at widest point Each **\$2.00**

THE NORKA

Construction same as "Akron," but made of less expensive materials. A very serviceable pad, made of good leather and rubber. It laces on. Salable line at competitive prices.

No. 3—5¼ in. long, 1¾ in. wide, formerly No. 2.
No. 4—5½ in. long, 1⅞ in. wide, formerly No. 3.

Price, each, **\$1.50**

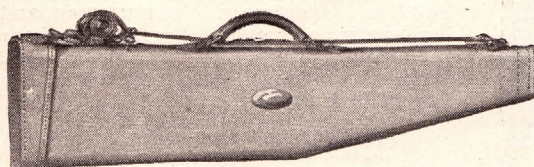

LEATHER GUN CASES

NOTE—In ordering, be particular to mention Length of Barrel for which cases are wanted

No. 1432—Leg o' Mutton Shape. Selected heavy russet sheep leather, flannel lined, nicely finished, with sling strap and handle. Made in 28, 30 or 32-inch Each, \$9.00

No. 1433—Leg o' Mutton Shape. Medium weight russet cowhide case leather, flannel lined, with handle, sling strap and lock buckle. Made in 28, 30 or 32-inch. Each \$10.25

No. 1434—Remington Automatic Gun Case. Leg o' Mutton shape. Medium weight russet cowhide case leather, flannel lined, lock buckle, handle and sling Each \$11.00

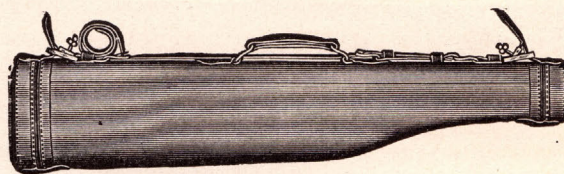

No. 1435—Leg o' Mutton Style. Medium weight brown cowhide case leather, maroon flannel lined, heavy brass trimmings, lock buckle, handle and sling, flannel rod pocket under partition. Each, \$11.50

No. 1436—Heavy Brown Cowhide Leather, maroon flannel lined, heavy brass trimmings; handsewed seams; made with rod pocket under partition; handle and return sling Each \$14.00

No. 1437—Leg o' Mutton Shape Rifle Case. Medium weight russet cowhide case leather, flannel lined; made with rod pocket under partition, handle and sling. State length of barrel. Each, \$10.25

No. 1437—French Style Best Grade Leather Case. This is the most compact leather case made. The barrel is put in breech first, which permits the stock to lay close to the muzzle end of the barrel, leaving no waste space, and is about one-third smaller than the Leg o' Mutton shape case. Made in extra quality heavy russet leather, green felt lined, with lock buckle, flat hand-made leather handle and sling strap. Made in 28, 30 or 32-inch. Each, \$18.00

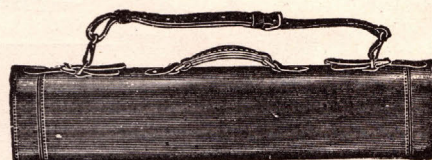

No. 1438. Same general description as No. 1437, but made of medium weight russet cowhide case leather, maroon flannel lined; handle and sling Each \$11.75

No. 1439—Single Barrel Trap Gun Case. Extra heavy dark maroon color leather, maroon flannel lined, flanged cap at both ends, the barrel being inserted into separate barrel pocket from small end and stock from opposite end. Brass locks and trimmings; handle and sling. Well made in every respect. Each, \$26.00

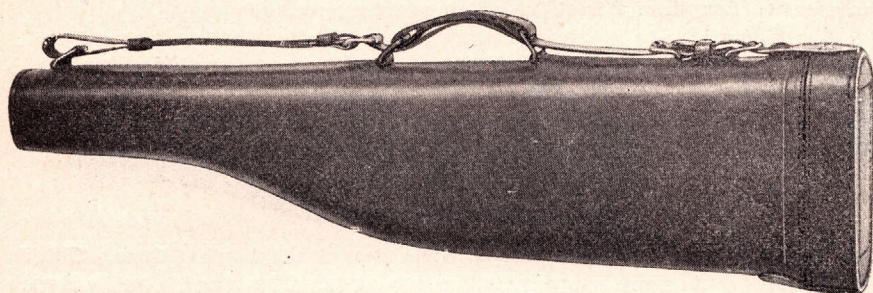

No. 1445—Double-End Gun Case. Heavy russet cowhide case leather, maroon flannel lining, brass lock buckle, hand-sewed seams, flat sliding handle and sling strap for Winchester and Remington Pump Guns Each, \$17.50

The Elliott Gun Case

No. 1446—The "Elliott" Gun Case is a little departure from the ordinary style of gun case. While exceedingly compact, the case is made roomy enough so that it will carry any 12 gauge or smaller double-barrel shotgun, a Winchester '97, the Remington pump gun, or other repeating gun. Made from a suitable weight cowhide, so stuffed with grease that it is almost chocolate in color and, therefore almost impervious to water. All brass trimmings, with sling strap Each, \$27.50

LEATHER GUN CASES

No. 1440. Double Barrel Gun Case

Made of Genuine Heavy Cowhide Smooth Grain Leather. Leather lined, brass fittings. Lock stitched smooth seams. Hinged partition to allow quick and easy handling of stock and barrels. Solid end and cover. Heavy strap and handle. Mahogany color only. For 30 or 32 inch barrels.

Each **\$20.00**

Special cases made to order.

No. 1441 Automatic Gun Case

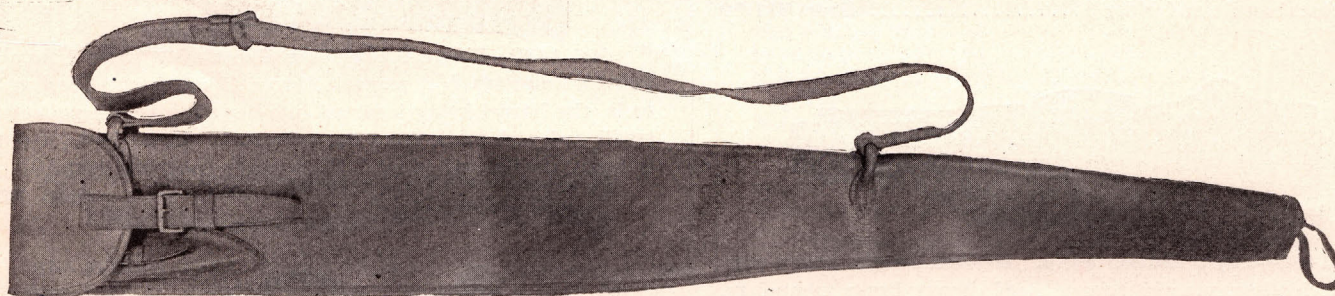

Made of Genuine Heavy Cowhide Smooth Grain Leather. Leather lined, brass fittings. Lock stitched smooth seams. Hinged partition to allow quick and easy handling of stock and barrels. Solid end and cover. Heavy strap and handle. Mahogany color only. For 32 inch barrels.

Each **\$20.00**

Pump Gun Cases, same construction as above.
For 31 inch barrels ... Each **\$20.00**

Special cases made to order.

ALL LEATHER GUN COVERS

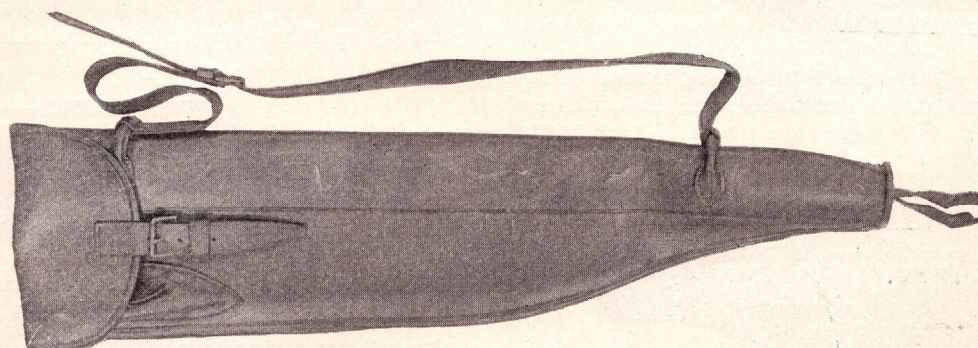

No. 1425

No. 1425......Full length cover, made of the finest 4 ounce soft cowhide leather. This cover has an extra flap at the mouth to keep out the dampness, thus protecting the gun in wet weather. It also has a side pocket. Strictly hand made, and guaranteed to be of the highest grade of workmanship and material, and to give satisfactory wear.

When ordering state if wanted for rifle or shot gun, and give length of barrel.

No. 1425. Price **\$14.50**

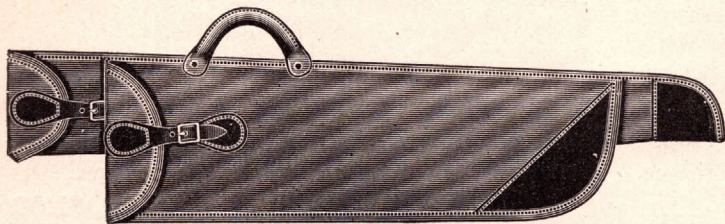

No. 1426

No. 1426. Made of the finest 4 oz. soft cowhide leather, extra flap at the mouth to keep out the dampness, thus protecting the gun in wet weather, side pocket. Hand-made, highest grade of workmanship and material.

When ordering give length of barrel.

No. 1426. Price **\$14.50**

CANVAS GUN COVERS

No. 1400—Made of the best quality 8-oz. double filled duck, flannel lined, barrel and stock parts leather reinforced; a high grade case. Made in the following lengths: 26, 28, 30 and 32 inches. Each, **\$1.50**

No. 1401—Same as No. 1400 but 12 oz. instead of 8 oz. double filled duck. Each **\$1.85**

No. 1402—Made of the best quality 12 oz. double filled duck, barrel and stock parts cloth reinforced, flannel lined and with outside pocket. Made in the following lengths: 26, 28, 30 and 32 inches. Each **\$2.00**

No. 1403—Same as No. 1405, but with leather instead of cloth. Each **\$2.25**

No. 1408—Made of the best quality 12 oz. double filled duck, barrel and stock reinforced with heavy mahogany leather. This case is flannel lined and has a heavy outside pocket. This is a case of distinction, made in the following lengths: 26, 28, 30 and 32 inches Each **\$3.25**

No. 1404. Made of heavy brown canvas, flannel lined, leather reinforcement over muzzle and action. Leather bound seams, round leather handle, large outside rod pocket. Made in shotgun sizes Each **\$2.40**

No. 1405. Auto Shot Gun Each **2.40**

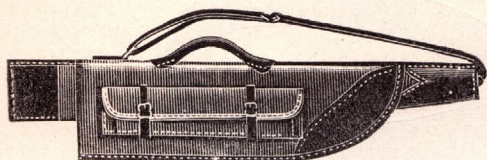

No. 1406. Same as 1404, but with shoulder strap. Each **2.50**

No. 1409. This cover is made of heavy army duck, slate in color and lined with heavy flannel. It has leather reinforcement over muzzle and action; leather binding on seams, round leather handle and large outside rod pocket with two buckle strap made in rifle and shot gun sizes Each **\$2.75**

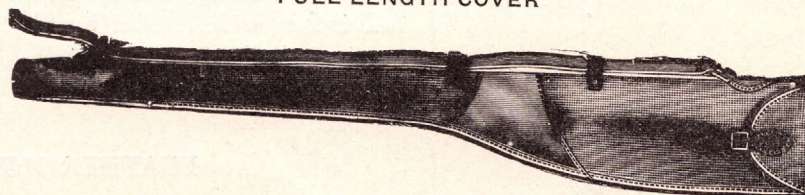

No. 1410. Auto Shot Gun. Each **2.75**

No. 1411. Similar to No. 1410, but made of the best grade 12 ounce army ducking, best quality leather and workmanship. The best canvas shot gun cover that can be made. Each **\$2.75**

No. 1407—Made of extra heavy canvas, flannel lined, with heavy leather reinforcement at both muzzle and breech of barrel, leather lock protector and pocket on side. This case has a leather shoulder strap for carrying. Made in the following lengths: 26, 28, 30 or 32 inches. Each **\$3.00**

FULL LENGTH COVER

When ordering, state if wanted for shot gun or rifle, and give length of barrel.

No. 1415—Made of canvas, flannel lined, with leather reinforcement at muzzle and lock, also having sling straps for carrying purposes.

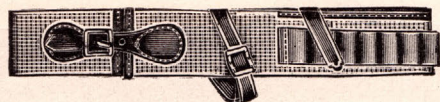

Each, **\$1.85**

No. 1417—Same as above but of extra heavy canvas; combination handle and sling; action and muzzle reinforced with genuine leather; cloth bound. Each **\$4.00**

No. 1420—Same as above, but heavy flannel lined and leather bound. Each **\$7.00**

CANVAS AND LEATHER SHELL BELTS

WEB SHELL BELTS

No. 1316. Made of olive tan woven web, 2 inch, with stopper and web shoulder strap, 12 gauge, auto lock clasps.
Price, \$1.25

WEB CARTRIDGE BELTS

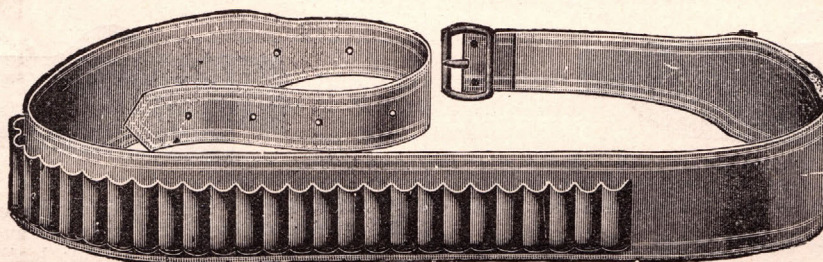

No. 1317. Made of olive tan woven web, web loops and web shoulder straps, for rifle and pistol cartridges. 32, 38, 44 or 45 calibers, auto lock clasps.
Price, \$1.00

CANVAS SHELL BELTS

No. 1315. Made of brown canvas, 2 inches wide, with web loops to hold 25 shells. 12 gauge only.
Price \$0.75

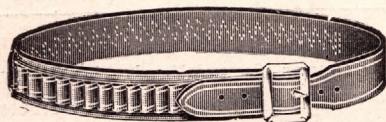

FIRST QUALITY HEAVY LEATHER SHELL BELT

No. 1328

No. 1328. Made of first quality, pliable, russet cowhide, 4 inches wide and with large nickel buckle. Each shell pocket is cupped and hand sewed. This shell belt has pocket space for 20 shells. As fine a belt as a sportsman can buy.
Price \$3.25

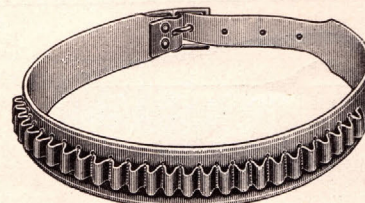

LEATHER CARTRIDGE BELTS

No. 1320

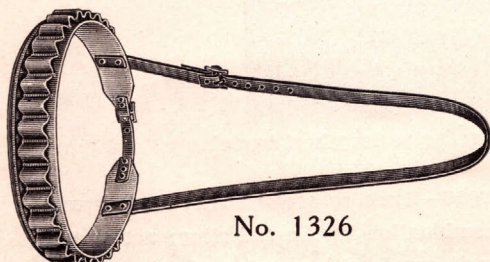

No. 1320—This shell belt is made of heavy russet cowhide, 1 3/4 in. wide, having large nickel buckle. This belt, although inexpensive, is made of very high grade material.
Price \$1.15

LEATHER SHELL BELT

No. 1321

No. 1321—Made from first quality russet cowhide, 2 inches wide, nickel buckle, made for 12, 16 and 20 gauge shells.
Price \$1.50

No. 1326

No. 1326—Made from first quality russet cowhide, 2 inches wide, nickel buckle, grain leather shoulder strap, made for 12, 16 and 20 gauge shells.
Price \$2.00

LEATHER SLING STRAP

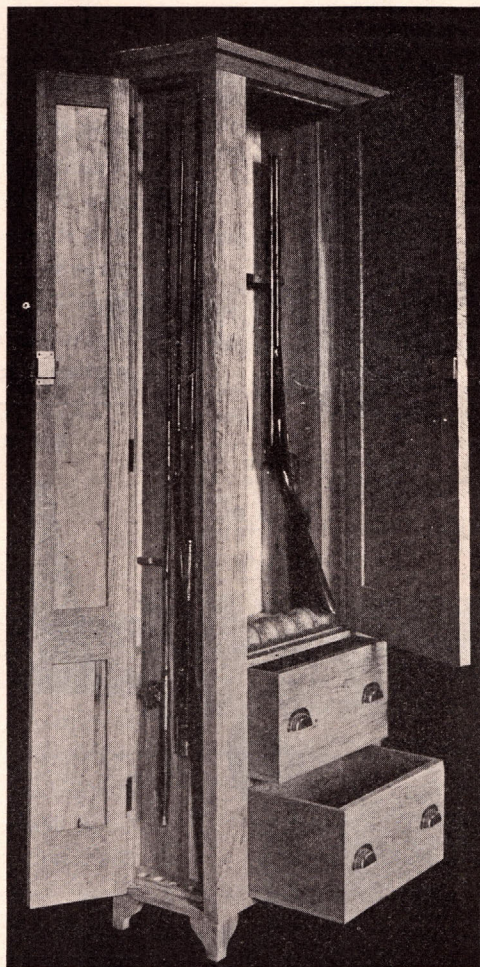

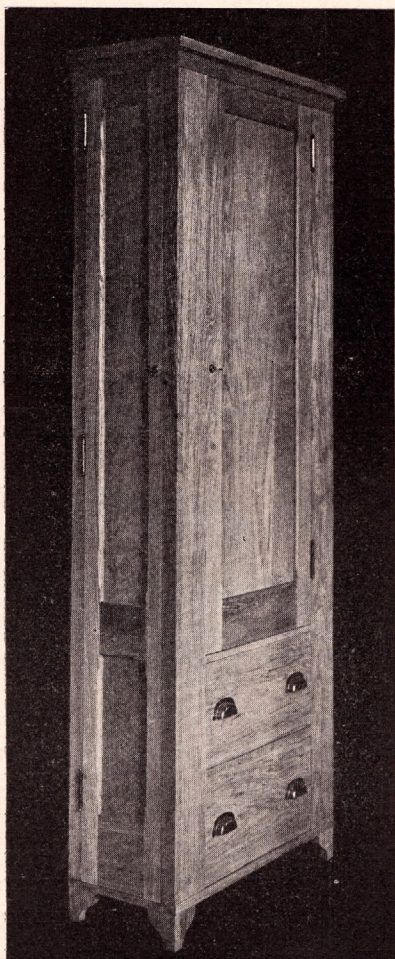

No. 1350—A gun-sling strap made of the best quality 4 inch hand borders leather with buckle attachment at each end, buckles being covered with leather. A splendid sling strap.
Price \$1.35

SPORTSMEN'S CABINETS

(Patent Applied For)

In placing these sportsmen's cabinets on the market, the designer has taken into consideration every practical feature, to cover the entire field of sportsmen's requirements for every season of the year.

Hunters and Fishermen recognize the fact that in order to thoroughly enjoy the pleasures of such sports their Guns, Fishing Rods, Reels, Tackle, Hooks, etc., should always be in first-class condition. The design and construction of our sportsmen's cabinets embrace every essential necessary for complete protection of your sporting equipment. They are dust and damp proof, very compact, and your outfit is instantly available.

These cabinets embody features that are far superior to any cabinets on the market today, and are the result of correct design, quality of material, and careful and accurate construction. Special cabinets designed and constructed to cover the entire requirements of sportsmen, in oak, mahogany, walnut, etc.

The gun stand holds six Rifles or Shotguns. The Fishing Rod Cases on each side of cabinet hold five rods each. Cabinet is 6 feet, 6 inches high, 30 inches wide and 12 inches deep.

BRASS RIFLE CLEANING RODS**One Piece Rods**

No. 4139. Brass Rod, 32 inches long, with jagged and slotted tip, and revolving cocobolo handle, 22 and 32 caliber. Each \$0.50

MARBLE'S RIFLE CLEANER

The sections are made of a number of discs cut from softest brass gauze. They are separated by small fibre discs and strung on a spirally-bent tempered steel wire.

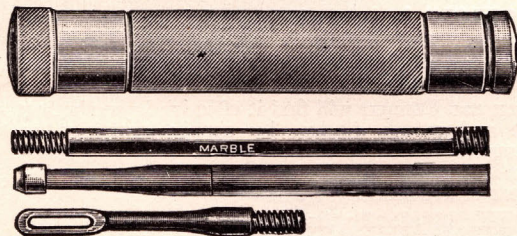

The sections are smaller than the bore of rifle or revolver, therefore the spiral core forces only one part of each section against the bore, with the result that the cleaner must follow the twist—reach into every angle of the rifling and rapidly remove all lead, copper, rust or powder residue.

When sections become worn on one side they can be turned.

Rifle Cleaner—Order by No. and Cal. Each \$0.60

No. 100	22 cal.	No. 112	33 cal.
No. 102	6 mm.	No. 114	35 cal.
No. 104	25 cal.	No. 114	38 revlr.
No. 106	28 cal.	No. 114	9 mm.
No. 106	7 mm.	No. 116	38 cal.
No. 108	30 cal.	No. 118	40 cal.
No. 108	303 cal.	No. 118	410 cal.
No. 108	8 mm.	No. 120	44 cal.
No. 108	32 revlr.	No. 122	45 cal.
No. 110	32 cal.	No. 124	50 cal.

(Average weight per dozen, 10 ounces)

MARBLE'S REVOLVER ROD

The screw capped, nickel-plated, brass handle accommodates the other parts, also any make or size of cleaner and an extra section if needed. It is $\frac{3}{4}$ by 5 inches in size.

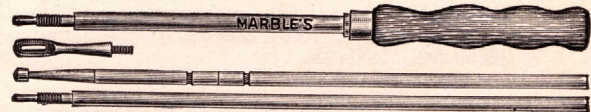

This makes a very complete, compact outfit which may be conveniently carried in the pocket.

The sections are made of brass. This rod does not have a swivel. Will clean barrel up to 10 inches.

No. 99—State caliber \$1.00
(Weight per dozen $4\frac{1}{2}$ pounds.)

BRASS REVOLVER CLEANER

No. 4140. Brass Rod, $11\frac{1}{2}$ inches long, cocobolo revolving handle, slotted wiper, and brass wire brush. Especially adapted for cleaning Target revolvers. 22 to 50 caliber. Each \$0.50

MARBLE'S JOINTED BRASS RIFLE ROD

Cuts below show cross sections of joints and swivel.

Will not "wobble", bend or break at the Joint.

When screwed together the rod is to all intents as solid as a one-piece rod, because the projection at end of the steel screw enters the hole beyond the threads in the solid brass section and relieves the screw of all side strain. The end section has a steel swivel which prevents joints from unscrewing when in the barrel.

Furnished with jagged and slotted tips, bag and attachments which make rod fit any size and make of cleaner. Lengths, 26, 30 and 36 inches.

No. 9622—.22 and .25 Cal. \$1.25

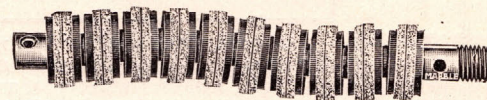

No. 9728—.28 Cal. and up 1.25

(Avg. wgt. per dozen: 9622, 5 lbs; 9728, 7 lbs.)

(Packed six in paper box)

MARBLE'S SHOTGUN CLEANER

Made to Fit All Standard Rods

The sections are made of a number of discs cut from softest brass gauze. They are separated by fibre discs and strung on a spirally-bent spring-tempered steel wire.

The sections are smaller than the bore, therefore the spiral core forces only one part of each section against the bore and gives equal pressure from chamber to choke. One thrust through the barrel cleans the entire surface. When sections become worn on one side they can be turned. Cleaner lasts a lifetime.

No. 135—10 Gauge \$1.00

No. 136—12 Gauge 1.00

No. 137—16 Gauge 1.00

"STOEGEROL"

Worth its weight in gold to every lover of a gun.

(TRADE MARK)

THE chemical and physical action of "Stoegerol" is based on the peculiar properties which enable its gases to penetrate into the molecules of the steel during their expansion caused by the explosion of the nitro powder upon discharge of firearm and its power of neutralization of nitro-gases. All there is necessary to protect your gun is to have it well oiled with "Stoegerol"—the rest "Stoegerol" will do for you.

"STOEGEROL" combines with water and dampness; it absorbs both, thereby absolutely protecting steel and iron even if kept days under water or months in dampness or under ground.

No Hunter, no Trapper, no Soldier, no Sailor, no Ranchman, no Farmer, no Householder can afford to be without a supply of "Stoegerol."

"STOEGEROL" dissolves and prevents rust and corrosion chemically and by itself in arms in which nitro-powder is used (pistols, revolvers, rifles, shotguns, machine-guns, field-pieces, etc.). Single application after using only required.

"STOEGEROL" protects steel, gun barrels and breech mechanisms absolutely against rust, even in water. At Army tests, Stoegeroled rifles were several days immersed in water and without being dried were placed in a damp

room for a month. These weapons remained unchanged and free of rust.

"STOEGEROL" does not affect the bluing of arms and preserves the wood. Two to five per cent dissolved in water, "Stoegerol" is the best cleanser and polisher for stocks and fine furniture.

"STOEGEROL" kills pus-germs and bacteria in wounds in man and beast, and sterilizes them until medical assistance can be procured. Effective in running sores, chafing and soreness after horseback riding, perspiring and sore feet, burns, frostbite, prickleheat, eczema, rheumatism, gout, colds in the head, coughs (rub nose, throat and chest or other affected parts with "Stoegerol.") If used before hiking and hunting tramps, prevents soreness and chafing. "Stoegerol" relieves piles, eczema, dry and moist, destroys fleas, body lice, mange, crabs, scabies and all other vermin on man or beast.

Price per can
\$1.00

The following is the result of a thorough trial of this gun oil at the U. S. Springfield Arsenal:

Two U. S. Rifles, caliber 30, Model 1903, were selected for this trial and were marked B1 and B2. These guns were cleaned and oiled with this oil. For the duration of this experiment, after having been cleaned and oiled with this oil, these two rifles were laid in a gun case and left in one of our gun rooms.

The trial commenced on September 25th.

Rifle B1 was used for twenty-five rounds, then cleaned with a swab and the inner barrel oiled with this oil. (Stoegerol.) On December 11th the barrel was examined and found absolutely free of rust. On February 15th another examination was made and the barrel again found free of rust. This experiment was terminated on April 18th, on which day a thorough examination was made. The barrel was wiped dry and no rust specks were to be found.

Rifle B2 was also used for twenty-five rounds and cleaned, then set aside for twenty-four hours, again cleaned and then oiled inside and out with this oil. On December 11th, an examination was made and no rust specks found. Upon the second examination, February 5th, no rust specks were found. The experiment was terminated on April 18th on which day thorough examination was made. The barrel was wiped dry and no rust specks were to be found either on the inside or outside of the barrel.

Price per can

"STOEGEROL" is of great importance for the preservation of leather, destroying mold and ferments, absorbs and swells leather at once, makes it waterproof and increases its durability to the utmost. Especially beneficial when used on shoes, boots, harnesses, saddles, etc.

"STOEGEROL" is the best lubricant for all fine mechanisms. Also for sewing machines, typewriters, all ball bearings, aeroplanes, ignition systems, motors, etc.

"STOEGEROL" is an invaluable rust protector for fine steel parts of machinery exposed to rain and water. It does not dry.

"STOEGEROL" aside from its many other uses is the only combination, gun, rust preventative, lubricating and wound oil. No army, navy, sportsman, factory, ranch, farm or individual should be without it.

PHYSICIANS AND DENTISTS

"STOEGEROL" is indispensable as a rust protector of surgical instruments. Dentists will find it never failing in separating positive plaster casts from the negative.

POULTRYMEN, RANCHMEN and FARMERS

"STOEGEROL" is invaluable to poultrymen in foot sickness, poultry diphtheria and pink eye. Beneficial results are obtained by daubing feet, eyes or throat with "Stoegerol."

Ranchmen and Farmers will find it effective in combating foot and mouth disease, by simply applying the "Stoegerol" freely to infected parts. Also very effective in treating udder and other inflammatory disorders of live stock.

"STOEGEROL" absorbs through the skin into the circulation and kills in this manner many cold bacillus in a short time. Most colds begin in the head and by rubbing the forehead, nose, throat and chest with "Stoegerol" quick relief will follow if applied in the early stages. For the same reason it relieves rheumatism, lumbago and gout.

"STOEGEROL" is a great seller and kept in stock by leading wholesale and retail dealers.

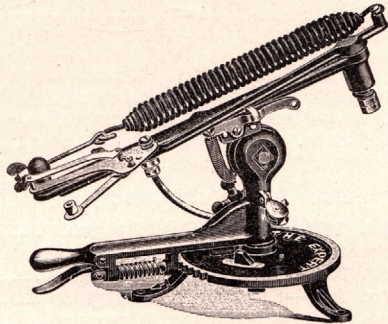

Order a supply of it today.

MARBLE'S WOODCRAFT KNIVES

Acknowledged to be the best seller of all outing knives. Best for all around use. Has the strength usually found only in much heavier knives. Has a sharp penetrating point, yet a blade of proper shape for skinning, ground down to a thin bevel just right for slicing and whittling. Back of point is beveled for breaking small bones.

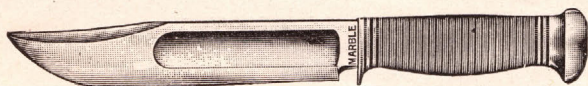

Handle 3¾ inches. Construction same as Ideal Knives. Sharpened to a keen edge. Finely polished. Furnished with sheath.

No. 49—Leather handle, blade 4½ inches, weight with sheath, 6 ounces\$2.25

MARBLE'S IDEAL KNIVES

On account of their quality, combination of several excellent features and beauty of design and finish, this knife won for the makers a world wide reputation as manufacturers of the highest quality of hunting knives. The blade is adapted to sticking and skinning; it is bevel ground at back of point for breaking small bones.

Knives Nos. 41 and 45 have a heavy tang onto which are driven washers made of sole leather, red and black fibre and brass. Bolster is brass. Tip is aluminum. All parts held rigidly in place by a round brass nut sunk into tip, engaging the threaded tang. Knife is highly polished.

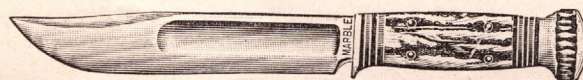

No. 41—5 in. blade with sheath, 7 oz.\$2.75

No. 41—6 in. blade, with sheath 8 oz. 3.00

No. 45—5 in. blade, with sheath 7 oz. 2.75

No. 45—6 in. blade, with sheath, 8 oz. 3.00

(Packed ½ dozen in paper box)

The handles of No. 42 and 46 knives are composed of two grooved slabs of selected stag horn, carefully riveted together and driven on the tang. Brass bolster. Tip is stag horn. Knife is highly polished.

No. 42—5 in. blade, with sheath 7 oz.\$3.50

No. 42—6 in. blade, with sheath, 8 oz. 3.75

No. 46—5 in. blade, with sheath 7 oz. 3.50

No. 34—Tube Sheath. 7 and 8-inch lengths75

No. 39—Hilt Knife Sheath. 4¼, 5 and 6-inch lengths60

No. 39—Hilt Knife Sheath. 7 and 8-inch lengths75

MARBLE'S ANTI-RUST ROPES

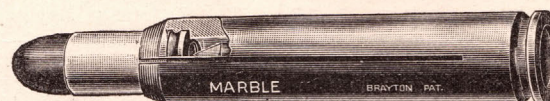

For Shotguns,
Rifles and
Revolvers

When saturated with oil these "ropes" exclude all air and moisture and make it impossible for the barrels to rust or become pitted. They are longer than the barrel and larger than the bore. This insures a constant pressure of oil against the entire circumference of the bore. One oiling will last for a year.

State length of barrel.

No. 140—For 10 Ga. Shotguns60
No. 141—For 12 Ga. Shotguns60
No. 142—For 16 Ga. Shotguns60
No. 143—For 20 Ga. Shotguns60
No. 146—For 28 Ga. Shotguns60
No. 144—For Rifles. State caliber60
No. 145—For Revolvers. State caliber30

MARBLE'S AUXILIARY CARTRIDGE

Rimless Cartridge Style

Places the pistol cartridges at the forward end of shell chamber for firing. Bullet takes rifling on being fired; does not strip and become deformed; does not lead the barrel. Gives thoroughly satisfactory results. It allows the use of very cheap ammunition for small game or target shooting in a large, high-power rifle.

The implement is simple, strong and its use is perfectly harmless to any part of the rifle. Can be used through the magazine if desired.

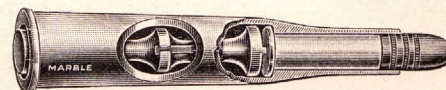

The States of Illinois and Michigan adopted Auxiliary Cartridges. This action was taken only after severe tests.

Order by numbers in list below \$0.85

(Packed one in an envelope. 12 envelopes to a box.)

MARBLE'S SAFETY AXES

Are large enough to fell a tree and small enough to carry in a pocket. A perfect axe for "blazing," clearing a trail, setting a tent, and as necessary in the woods as a gun or knife. The standard axe for Boy Scouts. A necessity for the auto tourist and safely carried anywhere in a car.

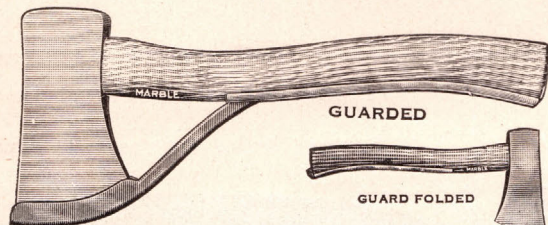

The nickel-plated, spring-hinged guard is lined with lead and folds into the handle. The blade is of tool steel, carefully tempered and sharpened. The handles are drop forged steel, nickel-plated, and never break. The side plates are of rubber. The wooden handles are of selected hickory with nickel-plated guard and receiver.

Nos. 2 and 3

No. 2 \$3.25

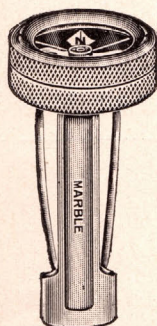

Weight 20 ounces. Length 11 inches. Solid steel blade, $2\frac{3}{8}$ x 4 inches.

No. 6 \$2.25

Weight 20 ounces. Length $11\frac{1}{2}$ inches. Solid steel blade, $2\frac{3}{4}$ x $4\frac{1}{4}$ inches.

IMPORTED OPTICAL GOODS

GENUINE PRISM BINOCULARS AND TELESCOPES

No. 2100

No. 2103

No. 2100—6X, 24 MM Diameter Prism Binocular. This glass is a very popular number owing to its slender form and light weight. It is especially adapted for tourists, for the study of nature, and for use at races and games.

This glass gives a field vision of 125 yards at a distance of 1000 yards. The length of the glass is 4 1-2 inches closed and 4 3-4 inches open; the weight is 16 ounces. **Price \$25.00**

No. 2101—8X, 27 MM Diameter Binocular. This is the most popular model because of its high power, combined with unusual compactness. For the above reason this glass is valued by tourists and hunters. We recommend this binocular as the ideal glass for all around outdoor use.

It gives a field vision of 115 yards at a distance of 1000 yards.

The length of the glass is 4 3-4 inches closed and 5 1-4 inches open; the weight is 17 ounces. **Price \$27.50**

No. 2102—10X, 30 MM Diameter Prism Binocular. This model is adapted for use in Marine and Field Work where higher power is desired. Owing to its larger objective and light-gathering capacity very little illumination is lost.

This glass gives a field vision of 100 yards at a distance of 1000 yards.

The length of the glass is 5 1-4 inches closed and 5 1-2 inches open; the weight is 18 ounces. **Price \$32.50**

No. 2103—12X, 30 MM Diameter Prism Binocular. This model is adapted for use in a fixed position, for great distances in determining the relative position of vessels out at sea or different features in the landscape.

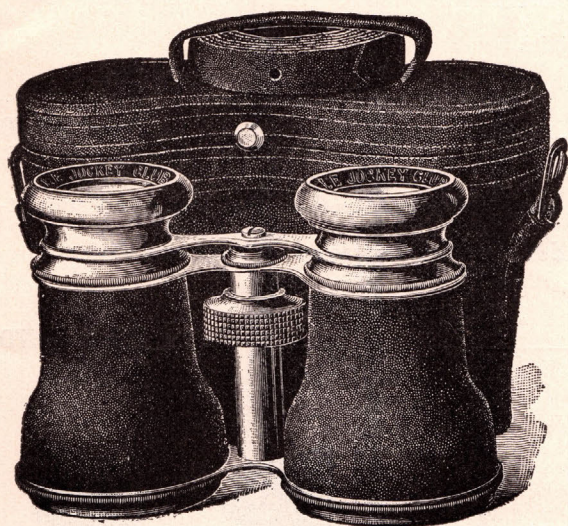

This glass gives a field vision of 90 yards at a distance of 1000 yards.

The length of the glass is 5 1-4 inches closed and 5 1-2 inches open; the weight is 18 ounces. **Price \$37.50**

EACH glass is furnished in a handsome real sole leather stitched case, plush lined and provided with a suitable shoulder strap.

Each glass is also provided with a neck strap which can be attached to the glass by means of metal loops, securely fastened to the mounting.

We carry the full line of

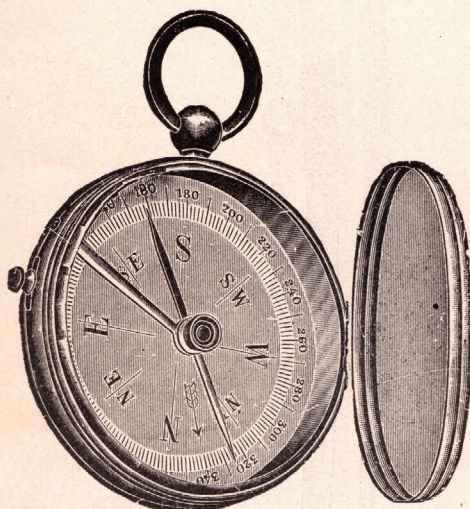

THE "ZEISS-JENA BINOCULARS" Embodying in a Prominent Degree the Following Features:

They are endowed with a remarkable light transmitting power. They have a large field of view—an exquisite definition. Objects are seen in striking relief and differences in their respective distances from the observer can be readily appreciated. The glasses are effectively protected from the access of dust and moisture and are therefore well adapted for use in the tropics. They are light and yet thoroughly rigid.

U. S. ARMY OFFICERS' SWORDS

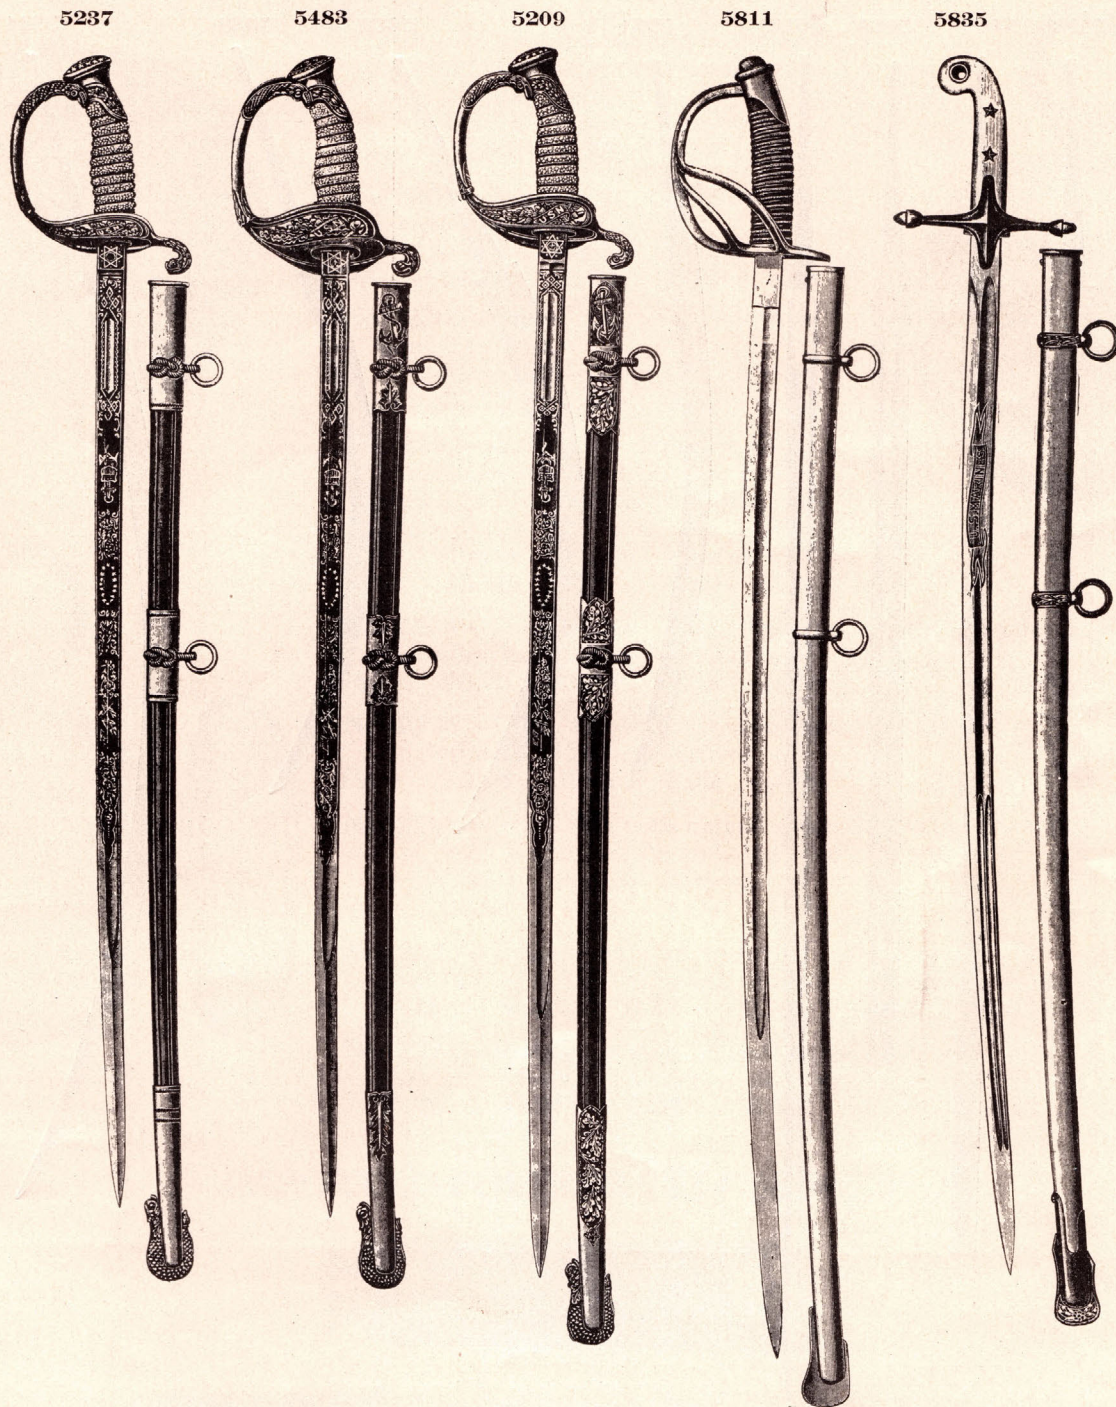

We beg to call special attention to the complete line of high-grade sabres and swords of which we make a specialty. These U. S. Army and Navy Swords are used by our Army and Navy. Their quality is unexcelled and needs no further comment.

Wherever Swords are used in Societies for presentation purposes—in Fencing Schools—Athletic Clubs, etc., our name is a household word. We ask you to give us a trial to convince you of the superior quality of our Swords.
